Daily Telegraph.

18th January. 1901.

By the death of Mr. H. W. Chisholm, St. Mark's-square, Regent's Park, the "Father of the Civil Service" has passed away, for although in point of age there may be still one, or even two, retired members who surpass Mr. Chisholm—who was ninety-three—in point of years, there is certainly no one now living who began work earlier last century than he did. At Christmas in 1824 he was appointed by Lord Grenville to a junior clerkship in the Bill Department of the Exchequer, in which his father was senior clerk before him. Some idea of the changes which have taken place in the Government offices since then may be gathered from the fact that when Mr. Chisholm joined his hours of attendance were from eleven a.m. to two p.m., and in addition to a six weeks' vacation there were holidays on all saints' days and red-letter days—about fifty-five in the year. Happy as the lot of a Civil servant is still supposed to be, it is not quite so light and pleasant as in the old days. After serving in a variety of offices, he was finally in 1866 appointed chief of a new department of the Board of Trade, dealing with weights and measures, with the official style of "Warden of the Standards." Henceforth his duties became scientific rather than financial. In 1877, having completed fifty-three years of service, he retired from office, and with his withdrawal the style of "Warden of the Standards" was dropped. In point of fact, he was the first and last of the Avoirdupois Wardens. A few years ago Mr. Chisholm wrote some interesting "Recollections of the Civil Service." *Many*

years previously compiled
the following papers.

CONTENTS.

PART I.

ACCOUNTS FOR GREAT BRITAIN AND IRELAND, SEPARATELY, 1688 to 1816.

- I.—Accounts of the NET Public Income and Expenditure of Great Britain, in each Financial Year from 1688 (the Period of the Revolution) to 5th January 1801 (the Period of the Union between Great Britain and Ireland); and of the other Receipts into and of the Issues from the Exchequer, distinguishing the Amounts raised by Creation of Debt, and the Amounts applied to the Reduction of Debt; showing also the Balances in the Exchequer at the Beginning and End of each Year - - - - - p. 3 to p. 225
- II.—Similar Accounts of the NET Public Income and Expenditure of Ireland, 1688 to 1800, inclusive - - - - - p. 227 to p. 357
- III.—Accounts of the GROSS Public Income of Great Britain, deducting Drawbacks, Repayments, &c., and Bounties of the nature of Drawbacks, and of the Gross Public Expenditure, including Payments out of the Gross Income in its Progress to the Exchequer for National Objects, and for the Collection of the Revenue; for each Financial Year from 5th January 1801 (the Period of the Union) to 5th January 1817 (the Period of the Consolidation of the Revenues of Great Britain and Ireland) - - - - - p. 359 to p. 391
- IV.—Similar Accounts of the GROSS Public Income and Expenditure of Ireland, 1801 to 1816, inclusive - - - - - p. 393 to p. 425
- V.—General Abstracts of the above Accounts of NET and GROSS Public Income and Expenditure (I.—IV.), from 1688 to 5 January 1817 - - - p. 427 to p. 441
-
- Appendix 1.—An Account of the Net Receipts of the Revenues of Great Britain, and of the actual Payments in each Year, from Lady-day 1685 to Lady-day 1688, together with the Total Amount and the Medium Annual Amount; showing also the Amounts raised by way of Loan, and applied to the Payment of Principal and Interest of Moneys borrowed during the same period - - - - - p. 444, 445
- Appendix 2.—Details of the Expenditure of Great Britain for Miscellaneous Supply Grants, in each Financial Year from 10th October 1783 to 5th January 1801; exclusive of the Amounts repaid in each Year to the Civil List, to replace Advances for such Supply Grants - - - p. 446 to p. 449
- Appendix 3.—Details of Amounts repaid to the Civil List, in each Financial Year, from 10th October 1757 to 5th January 1801, to replace Advances for Grants, pursuant to Addresses of the House of Commons, and to make good other Issues out of the Civil List for Miscellaneous Supply Services - - - p. 450 to 454
- Appendix 4.—Details of Sums repaid to the Civil List, in each Financial Year, from 5th January 1801 to 5th January 1817, to replace Advances for Grants, pursuant to Addresses of the House of Commons, and to make good other Issues out of the Civil List for Miscellaneous Supply Services, arranged in Classes - - - - - p. 455
- Appendix 5.—Explanatory Note on the Settlement of the Accounts of the Joint Expenditure of the United Kingdom, for Great Britain and Ireland respectively, during the Period from 5th January 1801 (the Date of the Union) to 5th January 1817 (the Date of Consolidation of the Revenues of the Two Countries); including an Explanation of Differences in Amounts of the Public Income and Expenditure of Great Britain, as stated in the Annual Finance Accounts upon which the Accounts of Joint Expenditure were based, and in the Balanced Accounts of such Public Income and Expenditure as now stated in Accounts III.; with the Result as affecting the Amount of Stated Balance finally due from Ireland to Great Britain on the Joint Expenditure Account - - - p. 456 to 477
- Appendix 6.—Table of approximate Dates, as nearly as can be ascertained, of the beginning and end of the several Wars and Naval and Military Operations in which this Kingdom has been engaged since 1688 - - - p. 478

G R E A T B R I T A I N .

I.—ACCOUNTS of the NET PUBLIC INCOME and EXPENDITURE of *Great Britain*, in each Financial Year from 1688 (the Period of the Revolution) to the 5th January 1801 (the Period of the Union between *Great Britain* and *Ireland*); and of the other Receipts into and Issues from the Exchequer, distinguishing the Amounts raised by Creation of Debt, and the Amounts applied to the Reduction of Debt; showing also the Balances in the Exchequer at the Beginning and End of each Year.

NOTE.—In these yearly accounts of Income of Great Britain, the Net Receipts from the following lesser heads of Revenue are included in the great heads of Revenue for the whole period from 1688, although not finally transferred to such heads till a later period.

In the “Customs” are included the Net Receipts of the $4\frac{1}{2}$ per cent. duty, which formed part of the Hereditary Revenues up to the reign of Queen Anne, but from that period were specially appropriated to the payment of certain salaries in the West India Islands, and other services appointed from time to time by the Crown. The Net Receipts of Seizures of Uncustomed Goods, which formed part of the Hereditary Revenues up to 1823, are also included in “Customs.”

In the “Excise” are included the Net Receipts of Wine Licenses, which also formed part of the Hereditary Revenues until the latter part of the reign of George II., when an annual sum was granted by Parliament in commutation. Up to that period (1757), the Wine Licenses were under the management of Special Commissioners, but were then transferred to the Commissioners of Stamps, and finally to the Excise in 1790.

In the “Excise” and in the “Post Office” are included the amounts of Revenue applied by the Receivers General in its progress to the Exchequer, in payment of ancient Pensions charged upon these Revenues, and originally granted out of the Hereditary Excise and Post Office Revenues. The amounts so applied were accounted for to the Exchequer as Revenue. The same are shown as Expenditure on the opposite side of the Accounts.

In the “Stamps” are included the Net Receipts from Licenses of Hackney Coaches, and of Hawkers and Pedlars, which duties were originally imposed in 1694 and 1697 respectively, although their management was not transferred to the Commissioners of Stamps until 1831. They were previously managed by a distinct Board of Commissioners.

See also explanatory notices on these subjects appended to these Accounts.

(1 to 3 Will. & Mary.)

5th November 1688 to 29th September 1691, and of the other Receipts into and Issues from the Exchequer, showing also the BALANCES in the Exchequer at the Beginning and End of the said Period.

	£.			9,512,853	1	8

* A very ancient mode of anticipating revenue, distinct from the ordinary practice of borrowing, was by the issue of Tallies of Pro. They were instruments of payment, and, in fact, formal assignments of specified amounts of anticipated revenue. They are distinguishable from the Tallies of Acquittance, which were instruments of receipt, and were sometimes called Tallies of Sol (*see* page 56). The Tallies of fictitious Loans were Tallies or acquittances for Sums not actually, but supposed to have been raised by Loan, and received into the Exchequer, which Tallies were made out and issued for Public Services in the same manner as Tallies of Pro. (*See* Comm. Pap., No. 443, of 1858, pp. 88 and 100-1.)

* Note.—The following amounts of Public Receipt and Expenditure for the year ended 29th September 1711 are included in the Account, but did not pass through the Exchequer.

Raised by Funded Debt, with Interest at 6 *l.* per cent. per annum, from 25th December 1711, incurred to the South Sea Company on the Loan of their Capital Stock, per Act 9 Anne, c. 21

Applied as follows:—

	£.	s.	d.
To pay Army, Navy, and Ordnance Debts unprovided for, to 29th September 1710, including Interest up to Christmas 1711 - - - - -	7,561,454	17	2
„ Capital of Loans in anticipation of Duties, &c., including 500,000 <i>l.</i> raised this year, and applied to the service of the year; including, also, Interest up to 25th December 1711 - - - - -	1,616,512	18	2
	9,177,967	15	4

The amount of Debts and Deficiencies, the holders of which were incorporated into the South Sea Company, per 9 Anne, c. 21, was estimated as follows:—

	£.	s.	d.
Navy Debt, to 29th September 1710 - - - - -	5,130,539	5	5
Army and Transport, ditto - - - - -	1,443,448	9	2
Ordnance, ditto - - - - -	154,324	15	8
Hanover Subsidy - - - - -	9,375	-	-
Interest on the above, up to Christmas 1711 - - - - -	791,299	5	9
Loans in anticipation of Duties, &c. - - - - -	1,808,577	11	-
Interest on ditto - - - - -	133,761	19	-
	9,471,326	-	-

Under the Act, this amount was authorized to be funded as a Debt due to the South Sea Company, with Interest at 6 per cent., amounting to 568,279 *l.* 10 *s.* per annum; but upon the subsequent making-up of the Accounts in 1714, the actual Debt to the South Sea Company was ascertained to be 9,177,967 *l.* 15 *s.* 4 *d.*, as above stated.

£ 20,691,525 10 10

into and Issues from the Exchequer, &c., in the Year ended 29th September 1711.

* The ancient pensions charged on these hereditary revenues were included in the Civil List Expenditure, in the Treasury Annual Revenue books, up to 29th September 1746, after which period they were excluded, and stated separately. These Hereditary Revenues were appointed in the Civil List Act of George the Second, amongst the funds applicable to His Majesty's Civil List, but subject to the existing charges upon these Revenues. See further "Hereditary Revenues," "Pensions," in the Appendix to these accounts.

						£.	29,081,021	7	6

* From this period and until the establishment of the Civil Contingencies Fund, it was the practice for the House of Commons to provide for certain Supply Charges, the amounts of which were not previously estimated, by an Address to the Crown to advance sums for those stated services, with the assurance that the expenses incurred should be repaid out of the grants of the next Session. These sums were, consequently, advanced out of the Civil List, and are included under the head of Contingent and Miscellaneous Charges; but the actual amount so advanced in the Financial Year is not distinguished in the Treasury Annual Revenue Books. See further "Supply Grants" in the Appendix to these Accounts.

(2 & 3 Geo. III.)

I R E L A N D.

II.—ACCOUNTS of the NET PUBLIC INCOME and EXPENDITURE of *Ireland* in each Financial Year from 1688, the Period of the Revolution, to 5th January 1801, the Period of the Union between *Great Britain* and *Ireland*; and of the other Receipts into and Issues from the Irish Exchequer, distinguishing the Amounts raised by Creation of Debt and the Amounts applied to the Reduction of Debt; showing also the BALANCES in the Irish Exchequer at the beginning and end of each Year.

NOTE.—In the following Accounts of the Income and Expenditure of Ireland, the Receipts of, and Expenditure out of, certain specially Appropriated Duties are distinguished, their amounts having passed through the Irish Exchequer, and formed part of the Public Expenditure, though applied to Local Purposes.

From the period of the Revolution the Total Net Receipts of Customs, Excise, and the Crown Lands were paid into the Irish Exchequer, without distinguishing the several amounts, by the Commissioners of the Revenues of Customs and Excise, under whose control and direction the Revenues of the Crown Lands were collected and managed. This system was continued until 1806, when separate Boards of Customs and Excise were appointed.

On the Expenditure side of these Accounts the Extraordinary Payments by King's Letters are distinguished, both in the Civil and Military Services, up to the year 1794, when the Public Expenditure of Ireland was brought more immediately under the control of Parliament. Previously to 1794, the Public Expenditure of Ireland was regulated chiefly by the Royal Authority, acting by Sign Manual Warrants granted from time to time, and authorising the several yearly payments under the two general heads of the Civil Establishment, and the Military Establishment, with the provision that no addition or alteration was to be made to the yearly charge except under the directions of Special Warrants under the authority of the Crown.

See also Explanatory Notices on these subjects appended to these Accounts.

AN ACCOUNT of the NET PUBLIC INCOME and EXPENDITURE of *Ireland*, in the Year ended
 Amounts raised by Creation of Debt, and the Amounts applicable to the Reduction of Debt;
 (4 Jas. II. and 1 Will. & Mary.) (The several Sums are converted into British Currency.)

G R E A T B R I T A I N .

III.—ACCOUNTS of the GROSS PUBLIC INCOME of *Great Britain*, deducting Drawbacks, Repayments, &c., and Bounties of the Nature of Drawbacks, and of the GROSS PUBLIC EXPENDITURE, including Payments out of the Gross Income, in its progress to the Exchequer, for National Objects and for the Collection of the Revenue; for each Financial Year from 5th January 1801 (the period of the Union) to 5th January 1817 (the period of the Consolidation of the Revenues of *Great Britain and Ireland*); and of the other Receipts into and Issues from the Exchequer; distinguishing the Amounts raised by Creation of Debt, and the Amounts applied to the Reduction of Debt; showing also the Balances in the Exchequer at the beginning and end of each Year.

EXPLANATORY NOTES.

1. In the following Accounts of the Gross Public Income and Expenditure of Great Britain, from 1801 to 1816 inclusive, the Amounts of Gross Income comprise the Exchequer Receipts, as shown in the Exchequer and Treasury Revenue Books, with the addition of the amounts of Gross Revenue applied in its progress to the Exchequer, to the payment of the costs of collection and management of the Revenue, and to other payments for national objects, as shown in the Finance Accounts; they also comprise the extra Receipts of the Naval and Military Departments applied by these Departments to Navy and Army Services, so far as they can be ascertained from the official books. The Services to which these amounts of Gross Revenue and of extra Receipts were applied are also included on the Expenditure side of the Accounts.

2. In the amount of charges of collection and management of Revenue, is included the charge for Irish Post Office Packets, as stated in the Finance Accounts, the whole expense of the Post Office Packet Establishment having been defrayed out of the British Post Office Revenue, and the whole of the profits of that Establishment, subject to the following payment to Ireland, being received by the British Office. By 24 Geo. 3, c. 6, an annual allowance of 4,000 £ (increased to 9,000 £ from 5th July 1815, per 55 Geo. 3, c. 145) was paid by the English to the Irish Post Office, as Ireland's share of the estimated profit of the Packet Postage between the two countries. This amount, included in the Total Gross Post Office Revenue of Great Britain upon the receipt side of the Finance Accounts, and accounted for, *per contra*, as a payment to Ireland, amongst the Charges of Management, is here excluded from both sides of the Account as belonging to the Revenue of Ireland. A similar course is adopted with respect to the amounts of Irish Inland Postage received in Great Britain.

3. In the charges of Collection of the Revenue paid out of Gross Revenue, on the Expenditure side, certain payments from the Exchequer of small sums to the Receivers of Land and Assessed Taxes are included, being in addition to the amount paid out of the Gross Revenue for management, as stated in the Finance Accounts. These annual sums will be shown separately in Appendix to Part II.

4. From the "other Payments for National Objects out of Gross Revenue," as stated in the Finance Accounts for each year, certain Imprest Advances to Collectors, &c. are here excluded, the amounts being subsequently accounted for, both on the Income and Expenditure side. These amounts would have been more correctly included under the head of "Balances of Gross Revenue outstanding in the hands of Collectors, &c.," to which head they were transferred in 1822, in pursuance of the recommendation of the Finance Committee of that year.

5. The *Net* Income only of the Crown Lands is included in these Accounts, as stated in the annual Balance Sheets prepared and presented to Parliament up to the present time, and in the Finance Accounts. This practice appears to have been adopted in consequence of the peculiar nature of this head of receipt. The income of the Crown Lands is more particularly a special and material source of the Hereditary Revenues, which are surrendered to Parliament for the public use, during the lifetime of the existing Sovereign only, and the net produce which is paid into the Exchequer from year to year alone becomes available for the public Expenditure. From the mode also in which the Accounts of the Crown Lands were kept up to comparatively a recent period, the sales and purchases of lands have been included in the Gross Income and expenses of management; and all charges for the improvements of the Crown property, and especially of the Woods and Forests, to which nearly, if not all, the receipts arising from them have been appropriated, have also been included in the annual Expenditure out of the Gross Revenue. These items belong strictly to the Capital Account; and it would not, therefore, be correct to include their amounts in the Annual Income and Expenditure of the Crown Lands. An Abstract Account of the Gross Receipt from the Crown Lands, applicable to Expenditure in each year from 1801 to 1866 inclusive, and of such Expenditure, will be shown separately in Appendix to Part II.

6. The Receipts of, and Expenditure out of, certain specially appropriated Duties, which were included in the preceding Accounts of Net Income and Expenditure, from 1688 to 1800 inclusive, are also included in the following Accounts of Gross Income and Expenditure up to 5th January 1817, their amounts having passed through the Exchequer, though applied to local purposes.

7. The payments for Miscellaneous Civil Services out of Supplies are arranged in Classes, according to the present practice, which was first adopted by the Treasury in 1843. (*See Memorandum on the Classification of the Miscellaneous Estimates, Report of Committee on Miscellaneous Expenditure, 1848, Part 2.*)

I R E L A N D.

IV.—ACCOUNTS of the GROSS PUBLIC INCOME of *Ireland*, deducting Drawbacks, Repayments, &c., and Bounties of the Nature of Drawbacks, and of the GROSS PUBLIC EXPENDITURE, including Payments out of the Gross Income, in its Progress to the Exchequer, for National Objects and for the Collection of the Revenue, for each Financial Year from 5th January 1801 (the Period of the Union) to 5th January 1817 (the Period of the Consolidation of the Revenues of Great Britain and Ireland); and of the other Receipts into and Issues from the Irish Exchequer; distinguishing the Amounts raised by Creation of Debt, and the Amounts applied to the Reduction of Debt; showing also the Balances in the Irish Exchequer at the beginning and end of each Year.

EXPLANATORY NOTES.

1. In the following Accounts of the Gross Public Income and Expenditure of Ireland, from 1801 to 1816 inclusive, the amounts of Gross Income comprise the Receipts of the Irish Exchequer, with the addition of the amounts of Gross Revenue applied, in its progress to the Exchequer, to the payment of Costs of Collection and Management of the Revenue, and to other payments for national objects, as shown in the Annual Finance Accounts. The Services to which these amounts of Gross Revenue were applied are also shown on the Expenditure side of the Accounts.

2. Up to 1806 the Total Net Receipts of Customs, Excise, Taxes, and the Crown Lands were paid into the Irish Exchequer, without distinguishing the several amounts of these heads of Revenue, by the Commissioners of the Revenues of Customs and Excise, under whose control and direction the Assessed Taxes and the Revenues of the Crown Lands were also collected and managed. Although the Gross Receipts under these several heads were shown in the Annual Returns to Parliament, the Repayments, Drawbacks, &c., and the other Payments out of these several Gross Receipts are not distinguished; the several amounts of the Gross Receipts under these heads *applicable to Public Expenditure*, as shown in these Accounts, cannot consequently be distinguished. In 1806 separate Boards of Customs and Excise were appointed, and from this year the Gross Receipts of Customs are shown separately in these Accounts; but the same practice was continued with respect to the Gross Receipts of Excise, Taxes, and the Crown Lands until 1827, when the management of the Revenues of the Crown Lands in Ireland was transferred from the Board of Excise to the same management as the Revenues of the Crown Lands in England, per 7 & 8 Geo. 4, c. 68.

3. The Receipts of, and Expenditure out of, certain specially appropriated Duties, are separately distinguished in these Accounts from 1801 to 1816 inclusive, their amounts having passed through the Irish Exchequer and been made applicable to the Public Expenditure, though applied to local purposes.

4. The payments for the Miscellaneous Supply Civil Services, out of the Annual Grants of Parliament, are arranged in Classes, according to the present practice, which was first adopted by the Treasury in 1843. (See Memorandum on the Classification of the Miscellaneous Estimates, Report of Committee on Miscellaneous Estimates, 1848, Part 2.)

IV.—AN ACCOUNT of the GROSS PUBLIC INCOME of *Ireland*, deducting Drawbacks, Repayments, &c., Payments out of the Gross Income, in its progress to the Exchequer, for National (41 & 42 Geo. III.) (The several Sums are converted into British Currency.)

* From 25th March 1813, when the Irish Civil List Pensions had been reduced to 73,846 l. 3s. 1d. per annum (or 80,000 l. Irish Currency), this sum was charged annually for these Pensions on the Civil List, under the provisions of the Irish Act, 33 Geo. 3, c. 34. But the amount actually paid under this head in each year is not distinguished in the official financial books. From 25th March 1813, the total annual charge for the Irish Civil List, including Pensions, was 207,692 l. 6s. 2d. (or 225,000 l. Irish Currency).

^c Including 276,000 £. Advance in 1802 from Great Britain, repaid.

APPENDICES.

1. An Account of the Net Receipts of the Revenues of Great Britain, and of the actual Payments in each Year, from Lady-day 1685 to Lady-day 1688, together with the Total Amount and the Medium Annual Amount; showing also the Amounts raised by way of Loan, and applied to the Payment of Principal and Interest of Moneys borrowed during the same Period - - - - - pp. 444, 445
 2. Details of the Expenditure of Great Britain for Miscellaneous Supply Grants, in each Financial Year from 10th October 1783 to 5th January 1801; exclusive of the Amounts repaid in each Year to the Civil List, to replace Advances for such Supply Grants - - - - - p. 446 to p. 449
 3. Details of Amounts repaid to the Civil List, in each Financial Year, from 10th October 1757 to 5th January 1801, to replace Advances for Grants, pursuant to Addresses of the House of Commons, and to make good other Issues out of the Civil List for Miscellaneous Supply Services - - - - - p. 450 to p. 454
 4. Details of Sums repaid to the Civil List, in each Financial Year, from 5th January 1801 to 5th January 1817, to replace Advances for Grants, pursuant to Addresses of the House of Commons, and to make good other Issues out of the Civil List for Miscellaneous Supply Services, arranged in Classes - - - - - p. 455
 5. Explanatory Note on the Settlement of the Accounts of the Joint Expenditure of the United Kingdom, for Great Britain and Ireland respectively, during the Period from 5th January 1801, the date of the Union, to 5th January 1817, the Date of Consolidating the Revenues of the two Countries; including an Explanation of Differences in Amounts of the Public Income and Expenditure of Great Britain, as stated in the Annual Finance Accounts upon which the Accounts of Joint Expenditure were based, and in the Balanced Accounts of such Income and Expenditure as now stated in Accounts III; with the Result as affecting the Amount of Stated Balance finally due from Ireland and Great Britain on the Joint Expenditure Account - - - - - p. 456 to p. 474
 6. Table of Approximate Dates, as nearly as can be ascertained, of the Beginning and End of the several Wars, and Naval and Military Operations, in which this Kingdom has been engaged since 1688 - - - - - p. 476
-

Appendix, No. 1.

AN ACCOUNT of the NET RECEIPTS of the REVENUES of *Great Britain*, and of the Actual Payment of the Annual Amount; showing also the Amounts raised by way of Loan, and applied to the Payment of the House of Commons; see Abstract of this Return, Commons Journals, 20 March 1689, &c.

Appendix, No. 5—continued.

ON the SETTLEMENT of the ACCOUNTS of the JOINT EXPENDITURE of the United Kingdom, for *Great Britain* and *Ireland* respectively, during the Period from 1 January 1801 (the Date of the Union), and 5 January 1817 (the Date of Consolidating the Revenues of the Two Countries); including an Explanation of Differences in Amounts of the Public Income and Expenditure of *Great Britain*, as stated in the Annual Finance Accounts, upon which the Accounts of JOINT EXPENDITURE were based, and in the Balanced Accounts of such PUBLIC INCOME and EXPENDITURE as now stated in Account III; with the result as affecting the Amount of stated Balance finally due from *Ireland* to *Great Britain* on the JOINT EXPENDITURE ACCOUNT.

Provision of Treaty of Union for defraying the separate expenditure of each country, and for apportioning the joint expenditure.

By the seventh article of the Treaty of Union, incorporated in the Act of Union, 39 & 40 Geo. 3, c. 67, that portion of the general expenditure of the United Kingdom, for each year, other than the charges of the public debt of each country, incurred before the Union, and which were to be separately defrayed by *Great Britain* and *Ireland* respectively, was thenceforth to be taken as joint expenditure, and to be defrayed by contributions from the two countries, in the respective proportions of 15-17ths by *Great Britain*, and 2-17ths by *Ireland*, according to the estimate then made of their proportional relative resources.

SEPARATE EXPENDITURE.

Separate expenditure for the public debt of each country, and for other services incurred before the Union.

Before proceeding to explain the mode in which this provision for apportioning the joint expenditure was actually carried out, some explanation may be given with reference to the separate expenditure of each country. No other separate expenditure, except the interest and charges of the public debt of each country, incurred before the Union, is mentioned in the Treaty of Union; but, in fact, all payments made in either country after the Union, on account of services prior to its date (1 January 1801), were also included in the separate expenditure.

Explanation as to the public debts of *Great Britain* and of *Ireland* respectively, at the Union.

There is only one point in relation to the separate expenditure which appears to require notice here, and to which attention has not hitherto been drawn, either in the Report of the Select Committee on the Taxation of *Ireland*, or in the evidence and statements laid before the Committee, in 1864 and 1865. This point involves the amount of the public debt of each country at the period of the Union, and the circumstances under which the debt of *Ireland* then bore so small a proportion to the debt of *Great Britain*.

Comparatively small public debt of *Ireland* at the Union.

On 1st January 1801, the date of the Union, the relative liabilities of the two countries for their respective public debts amounted in value to 329,868,585*l.* for *Great Britain*, and 23,198,810*l.* for *Ireland*, being as 28·4 to 2; whilst the annual charge of unredeemed debt was 17,338,567*l.* and 1,244,465*l.* respectively, or nearly as 28 to 2. It may be important to consider the circumstances under which the public debt of *Ireland* bore so small a proportion to the debt of *Great Britain*, when compared with their estimated relative resources; the more particularly as it was provided by the same article of the Treaty of Union that, at any time thereafter, when the values of their respective debts should be in the same proportion to each other as their respective contributions to the joint expenditure, it should be competent to Parliament that the whole future expenditure should be defrayed by equal taxes imposed on the two countries.

And still less before the war with France, which began in 1792.

But small as was the public debt of *Ireland* at the time of the Union, when compared with the public debt of *Great Britain*, yet it was still proportionally very much less immediately before the beginning of the war with France, in 1792. At that time the nominal amount of principal of the Funded and Unfunded Debt of each country was respectively 237,408,669*l.* and 2,254,752*l.*, or as 215 to 2. These sums, however, do not include the amounts of Life and Terminable Annuities, which bore a larger ratio in *Ireland* to the remaining portion of the debt, than in *Great Britain*. A more just comparison may be made of the annual charge of the unredeemed public debt of the two countries, that of *Great Britain* being, on 5th January 1793, 9,301,084*l.*, and of *Ireland*, 131,095*l.*, or as 141 to 2.

No. 443 of 1858.

Actual and relative increase of the public debt of each country, from 1792 to 1801.

From 1792, with the greatly increasing expenditure caused by the war, to which *Ireland* was then called upon to contribute, the public debt of *Ireland* also proportionally increased, and necessarily in a far greater ratio of increase than the debt of *Great Britain*. It may be seen, from the figures already stated, that the actual increase of the annual charge of the public debt of each country from the beginning of the French war up to the period of the Union, amounted to 8,693,350*l.* in *Great Britain*, and 1,113,370*l.* in *Ireland*, or as 17 to 2. Thus whilst the actual increase of the annual charge of the debt of *Great Britain* during this period was 93 per cent., that of *Ireland* was no less than 849 per cent.

Appendix, No. 5—*continued.*

The cause of the very considerable difference in the amounts of the public debt of the two countries at the period of the Union, is at once therefore obvious. For a few years only previously to the Union, had Ireland borne any share of the general war expenditure of the empire. The first increase to her public debt arising from such expenditure occurred in 1793. Even up to the period of the Union, Ireland's contributions to the general war expenditure were confined to the Army and Ordnance Services. She contributed no amount whatever towards the navy expenditure, until she was called upon to pay her proportionate share of such expenditure after the Union, upon the settlement of the joint expenditure account, in pursuance of the provisions of the Act of Union.

Ireland exempt from contributing to the general war expenditure, previously to 1792, and to the naval expenditure, previously to the Union.

If the information could now be ascertained, it would be interesting to learn the precise circumstances under which Ireland was thus for the first time, in 1793, called upon to bear her share of the general war expenditure of the empire. But this information has been sought in vain. It is certain, however, that the burden was first begun to be placed upon her at a period before the Union was either accomplished or even contemplated.

Circumstances under which Ireland first charged with war expenditure, uncertain.

It would indeed appear that Ireland undertook this participation of the general war expenditure on the first occasion of the occurrence of hostilities *after the passing of the relaxing laws of 1782 and 1793*, and as a consequence of the concessions then made to her. Some evidence of this having been the case may be found in the following extract from the reported speech of one who had himself been one of the most distinguished members of the last Irish Parliament. Upon the second reading of the Roman Catholic Relief Bill in the House of Lords, on the 4th April 1829, the late Lord Plunkett said:

Life of Lord Plunkett, Vol. 2, p. 277.

“From 1793, when the principal relaxing law was passed, Ireland assumed a place among nations which she had never before attained. She became a powerful assistant of this great empire, and was associated with her in the high destiny of administering the affairs and promoting the civilization of the world.”

It is certain, also, that the very large amount of the public debt of Great Britain at the time of the Union, relatively to that of Ireland, was caused by the whole burden of the expenditure of the wars before that with France, which broke out in 1792, having been placed on Great Britain alone. A very little consideration of the origin and progress of the public debts of the two countries up to that period will prove this fact.

Comparatively large public debt of Great Britain, caused by the whole burden of general war expenditure, previously to 1792, being thrown upon her.

It should be borne in mind that the expenditure defrayed *out of monies raised by creation of debt* in aid of the charges of the several wars in which this kingdom was engaged from the period of the Revolution, was a portion only of the total cost of such wars. A more correct estimate of the total cost, including the expenditure defrayed out of yearly revenue raised for this purpose, will be found amongst the explanatory notes in Part II.

Distinction between public debt caused by war expenditure, and total cost of war.

The following Table shows in an abstract form the progressive amounts of the public debt of Great Britain and of Ireland respectively, as affected by the several wars from 1688. The approximate dates, as nearly as can be ascertained, of the beginning and end of the several wars and naval and military operations in which this kingdom has been engaged since 1688, will be found in Appendix 6.

Tabular abstract of progress of such public debt of Great Britain, and of Ireland, from 1688.

Appendix, No. 5—*continued*.

JOINT EXPENDITURE.

How provision of Act of Union for apportioning the joint expenditure carried out.

The mode by which the provision of the Act of Union for apportioning the joint expenditure of the United Kingdom was actually carried out was two-fold: 1st, as regards the *estimated* joint expenditure; and 2ndly, as regards the *finally settled* expenditure.

Appendix, No. 5—continued.

1.—The *Estimated Joint Expenditure*.

The proportionate amounts of the estimated joint expenditure to be paid by each country were agreed upon by the Chancellors of the Exchequer for Great Britain and Ireland respectively, and stated by them in their annual Budgets. In order to meet this proportionate amount of joint expenditure, together with the estimated separate expenditure of each country, the necessary Ways and Means were provided, partly from revenue, and partly from money raised by creation of debt. The separate debts of each country were thus augmented in each year during the whole period of the 16 years, by raising money to provide for *estimated* expenditure only.

This estimated joint expenditure apportioned to each country was calculated upon the several proportions of 15-17ths and 2-17ths of the total amounts of the Military, Naval, and Miscellaneous Supply Charges, as well as Consolidated Fund Charges, to be defrayed in the two countries, and taken to be joint expenditure.

The mode of ascertaining the total amount of estimated joint expenditure to be apportioned, will be seen more clearly by giving the actual figures for the year 1801, ending 5th January 1802.

1. As to Estimated Joint Expenditure. Mode of ascertaining estimated total amount, and proportion for each country.

Illustrated by stating amounts estimated for 1801-2.

ESTIMATED JOINT EXPENDITURE, 1801.

(The Amounts for *Ireland* are stated in British Currency.)

	Estimated Joint Expenditure in each Country, per Budget.		
	In Great Britain.	In Ireland.	TOTAL.
	£.	£.	£.
Navy - - - - -	15,800,000	- -	15,800,000
Army - - - - -	12,117,000	3,785,000	15,902,000
Vote of Credit - - - - -	500,000	300,000	800,000
Ordnance - - - - -	1,639,000	299,000	1,938,000
Miscellaneous Supply Grants - - -	550,000	207,000	757,000
Ditto, Consolidated Fund - - -	1,170,000	390,462	1,560,462
Total estimated Joint Expenditure in each Country - - - - -	31,776,000	4,981,462	36,757,462
Proportions of 15-17ths and 2-17ths - -	32,433,702	4,323,760	
Increase or Diminution of proportionate Expenditure to be contributed by each Country	+ 657,702	— 657,702	

It will be seen that the estimated joint expenditure to be defrayed in Ireland during the year 1801, as stated in the Budget, the amount of which (so far as regards the Supply Charges) agreed substantially with the detailed Estimates submitted to Parliament, and with the grants in the Appropriation Act, exceeded by 657,702*l.*, the amount which it was calculated she would be called upon ultimately to pay. It will also be seen that it exceeded by the same sum the Ways and Means provided to meet her proportionate amount of joint expenditure, causing a temporary Deficiency of Ways and Means to this extent; and, on the other hand, that the Ways and Means provided in Great Britain for the estimated joint expenditure to be defrayed in that country, during the year, were in excess, by exactly the same sum of 657,702*l.*

Excess of estimate joint expenditure in Ireland for 1801, over her proportion. Consequent deficiency of Ways and Means provided for her proportionate expenditure; and corresponding excess in Great Britain.

It was therefore evidently contemplated that, at the close of the year, and as soon as the actual expenditure in each country was ascertained, a settlement of the accounts should be made, and the balance due from one country to the other paid over. Some evidence appears that such a settlement was then contemplated. In the expenditure accounts of Ireland for 1801, presented to Parliament in the Session of 1802, and dated 27 May 1802 (*see* Commons Journal, Appendix 58, p. 861), the amounts of the separate charges only are stated, a blank being left for the amount of "Proportionate Contribution for United Kingdom, 2-17ths;" and the following note is appended: "Note. The above account cannot be closed until the actual amount of the expenditure of the United Kingdom can be ascertained."

Immediate settlement of the joint account necessarily contemplated; evidence that it was so.

Appendix, No. 5—continued.

2.—The *finally settled* Joint Expenditure.

2. The finally settled joint expenditure. Causes of delay in determining the joint expenditure.

Although it was necessary thus to agree beforehand upon the amount of the estimated joint expenditure, and its apportionment to each country, in order to determine and to provide the necessary ways and means to meet it, yet no further action could be taken for the final settlement of the accounts until after the close of the year, when the total actual expenditure in each country could be ascertained. A cause of far greater delay in the settlement of the accounts arose from the fact that there existed no recognised or authorised tribunal for the examination of the accounts, and for determining what portion of the whole actual expenditure should be considered as joint expenditure to be apportioned between the two countries, and the amounts of the relative proportions, or for determining the principles upon which the accounts of the joint expenditure should be regulated; these principles not being distinctly laid down in the seventh article of the Treaty of Union, which refers in general terms only to the proportionate contributions of each kingdom towards the expenditure of the United Kingdom, "other than the interest and charges of the debt to which either country should be separately liable."

First record of any attempt towards a settlement, in 1804.

There appears to be no record of even any attempt towards a settlement of the accounts of the joint expenditure until 1804. In that year the Irish Budget was brought forward by Mr. Forster, as a private Member, after Mr. Corry's resignation, and before a new Irish Chancellor of the Exchequer was appointed. He is reported to have said that—

Hansard,
20 June 1804.

"Although the Union with Ireland had been four years in operation, and though Committees had been appointed to investigate the joint accounts between the two countries, yet to this hour no balance had been struck to show how the two countries had been going on, or whether Ireland was paying more or less than her quota to the common expense. But although the short remnant of the Session might not afford opportunity to produce any satisfactory result upon this head, he hoped, the commencement of the next, to have the accounts in such a state of forwardness as to be able to show a clear statement."

It is probable that this is an imperfect report of what was actually said by Mr. Forster, as there is no record of any Committees being appointed during these years for the purpose of investigating the accounts, or of the proceedings of any such Committees.

First Committee on Joint Accounts, 1805. No report.

In March 1805, a Committee of the House of Commons was first appointed to examine and report the amount of the joint charge from 1801, with a view to ascertain the balance due from either country to the other. This Committee made no report.

Second Committee, 1806.
First Report of preliminary proceedings.
296/1806.

In the next Session (1806) a Committee was appointed for the like purpose, and reported "That they had not been able to report the joint charge on Great Britain and Ireland, or to ascertain the relative situation of the two countries as to their expenditure, in consequence of an error in the formation of the accounts transmitted to them from Ireland, in which the sums expended for services prior to the Union were not distinguished with sufficient exactness. They had thought themselves bound to call before them such officers as they supposed were most capable of giving them information as to the mode of keeping and auditing the public accounts in Ireland, with a view to ascertain in what manner the intentions of Parliament could best be carried into effect; and having discovered, by the evidence taken before them, to what offices application must be made for these accounts, they had directed their Chairman to move that the said accounts be laid before the House of Commons early in the next Session of Parliament. They had therefore the satisfaction of believing that their investigation had led to put the business referred to them in such a train as to leave no doubt that, should the Committee be revived in the ensuing Session, they would then be able to present a definite report on the subject."

With reference to the accounts mentioned in the Report as being directed to be moved for by the Chairman, there appears to be no further record of them, than the following entry in the Commons Journals: "11 July 1806. Committee reported."

First statement of any balance on the joint account being struck between the two countries, in 1806.
Hansard.

Meanwhile the first allusion to any definite balance being struck on the joint account between the two countries appears in the Budget of Sir John Newport, the Irish Chancellor of the Exchequer, on 7th May 1806. He is reported to have said, "There was another sum he hoped to have looked to this year, in aid of the ways and means of Ireland, and that was the balance due to Ireland upon the joint contribution, amounting to 860,000*l*. But upon examining the accounts for last year, it appeared that the excess of payment on the part of Great Britain was 560,000*l*, and the remaining 300,000*l*. was absorbed by the money advanced by England for the payment of the Lottery prizes."

No further proceedings for a definitive settlement of the Joint Account until 1811.

There appears to be no record of the evidence and accounts produced before the Committee of 1806, and referred to in their report, and no further proceedings were taken for a definitive settlement of the joint account till 1811.

Third Committee, 1811, Second Report, 262/1811.

In 1811 a Committee was appointed to inquire into and report upon the Debt, Revenues, and Expenditure of Ireland for the last 20 years, with reference also to "the amount expended on account of the joint expenditure of Great Britain and Ireland, or which might appear to be still due on that account."

Appendix, No. 5—*continued*.

The Committee reported, and for the first time discussed and settled, subject to the final judgment of Parliament, the principles by which the account of the joint expenditure ought to be regulated with respect to certain articles as to which the sense of the Act of Union appeared to admit of question. With respect to these points the Committee were of opinion—

Principles by which joint account to be regulated.

1. That the payments made in Ireland for compensations for cities and boroughs ceasing to send Members to Parliament in consequence of the Union, should *not* be considered as a joint charge.

2. That the charges of Management of the Revenue should be considered as joint charge.

3. That payments made for compensations for offices suppressed or rendered less valuable in consequence of the Union should be considered as joint charge.

4. That payments made for Inland Navigations in Ireland, under the Irish Act, 40 Geo. 3, c. 51, should be considered as a joint charge.

The Committee appended to their Report abstract accounts of the joint expenditure of Great Britain and of Ireland for each of the 10 years, 1801–10, prepared under their directions by the officers of the Treasury and of the Irish Exchequer, as the basis of a final adjustment of the accounts.

Abstract accounts for each year, 1801–10 inclusive, appended to Report.

In these abstract accounts the following additional points were practically determined by the Committee:—

5. All payments during these years for services incurred prior to the Union (except for Inland Navigations (4), as well as all payments which did not appear to belong to the joint account of the United Kingdom, were deducted from the joint charge.

6. Payments for national objects out of gross Revenue, in anticipation of the Exchequer Receipt, were considered as joint charge.

From these accounts the Committee struck the balance due from one country to the other at the close of each year, showing that on 5th January 1811, there was owing from Ireland, as the balance of her proportion of the expenditure of the United Kingdom (subject to such correction as a more exact investigation might produce), the sum of 1,467,929*l.* 17*s.* 1*d.* British currency.

Balance struck between the two countries for each year.

In 1812, the Committee was reappointed and made a further Report, principally with reference to the Consolidation of the debts of the two countries. With respect to the joint expenditure they determined a further point:—

Fourth Committee, 1812, Third Report, 376/1812.

7. That payments in the British expenditure, consisting of imprests to public accountants, afterwards repaid, should have been deducted from the joint charge. These sums amounted to 864,055*l.*, by two-seventeenths of which sums the charge upon Ireland was to be reduced.

After this and other corrections, the Committee struck a fresh balance for each of the 11 years, 1801 to 1811, showing a balance due from Ireland on 5th January 1812 of 1,656,276*l.*

Expenditure in Great Britain for imprests, afterwards repaid, to be deducted from joint expenditure.

Accounts continued for 1811.

Fifth Committee, 1813.

Fourth Report, 309/1813.

Accounts continued for 1812.

Sixth and last Committee, 1815.

Fifth Report, 214/1815.

Accounts continued for 1813 and 1814.

In 1813 a Committee was appointed, but did little more than continue the statements of the accounts made in the former reports.

In 1814 no Committee was appointed.

In 1815 a Committee was appointed, who investigated the former reports and accounts which they continued to 5th January 1815, on the principles adopted in 1812, and they showed a balance due by Ireland to Great Britain, on 5th January 1815, of 6,107,987*l.*, sterling.

Proviso of Treaty of Union recommended to be carried out, for discontinuing proportional contributions to joint expenditure, and defraying the whole by equal taxation.

The most important recommendation of this Committee referred to the proviso in the latter part of the 7th article of the Treaty of Union, by which, in the event of the respective debts of the two countries becoming to each other at any future time in the proportion of their respective contributions, it should be competent to Parliament to declare that the whole expenditure of the United Kingdom should be defrayed indiscriminately by equal taxes imposed in each country, and that thenceforward it should be no longer necessary to regulate the contribution of the two countries towards the future expenditure of the United Kingdom, according to any specific proportion, or according to any of the rules before prescribed. The Committee were of opinion that the time had arrived when it had become expedient that Parliament should take this proviso into consideration.

Appendix, No. 5—continued.

Act 56 Geo. 3, c. 98, for consolidating the revenues of Great Britain and Ireland, and applying them indiscriminately to the

In pursuance of this recommendation, Parliament, during the following Session, passed the Act 56 Geo. 3, c. 98, by which the revenues of the two countries were consolidated, and made applicable indiscriminately to the expenditure of the United Kingdom, from 5th January 1817.

Act 57 Geo. 3, c. 48, for further adjusting the accounts of the United Kingdom. Balances due on the joint account cancelled.

In 1817, this Act was amended by the 57 Geo. 3, c. 48, for making further provision for the adjustment of the accounts of the United Kingdom. Under sect. 4, all balances due from Great Britain to Ireland, or from Ireland to Great Britain, in any manner arising out of the joint contribution of each country to the expenses of the United Kingdom under the Act of Union, were cancelled, and deemed to be satisfied and discharged.

Further accounts for 1815, presented to Parliament in 1816.

Although no accounts of the joint expenditure of the two countries to a later period than to 5th January 1815, were submitted to the investigation of a Parliamentary Committee, similar accounts continued up to the 5th January 1816, and showing the balance due from Ireland at that date, were presented to, and printed for, Parliament in the Session of 1816.

337/1816, reprinted in Appendix to Report of Taxation of Ireland, 1864, p. 460.

But no statement of the joint accounts for the following year, and continued up to 5th January 1817, was published or printed, until the whole subject was investigated by the Committee on the Taxation of Ireland in 1864; and no such statement could then be found in the financial books, nor amongst the records of the Treasury or of the Exchequer. It happened, however, that the private papers of Mr. John Smith, the officer of the Irish Exchequer, by whom the Irish accounts were prepared for the Committees of 1811 and up to 1815, had been preserved by his son, Mr. Edward Smith, who at the time held the office of acting Assistant Paymaster General. These papers were placed by him at the disposal of the officers of the Treasury and Exchequer, who had been called upon to furnish information to the Irish Taxation Committee. Amongst those papers was an original manuscript account, in Mr. John Smith's handwriting, of the payments in both countries on the joint account for the year ending 5th January 1817, thus completing the series, and which account was furnished to the Irish Taxation Committee, and appended to their report.

No account of the joint expenditure for 1816 presented to Parliament till 1864. How prepared.

Appendix to Report, 1864, p. 351.

Complete account of the joint expenditure, from 1801 to 1817, also presented in 1864.

From this paper, and with the aid of the Finance Accounts and official books of the Treasury and Exchequer, a complete account of the joint expenditure in Great Britain and in Ireland for each year, during the whole period from 5th January 1801 to 5th January 1817, showing the proportions to be contributed by each country, and the balance due from one country to the other at the close of each year, was furnished to the Irish Taxation Committee and to Parliament. This account was made up upon the principles adopted by the Committees of 1811 and 1812, and corrected some errors in the figures which had crept into the former accounts.

Appendix to Report, 1864, p. 389.

Comparative abstract accounts of estimated, and of finally settled joint expenditure, 1801–1816.

The following abstract accounts of the joint expenditure for each of these 16 years, include not only a comparison of the estimated amounts of such annual expenditure in each country, with the proportional amounts, as stated to Parliament in the several budgets; but also a similar comparison of the amounts of the joint expenditure in each country, which were actually defrayed in each year, as it was finally settled, according to the principles laid down by the Committee of 1811 and of 1812, with the proportionate amounts of such finally determined joint expenditure. This last account shows also the actual balance due to or from Ireland at the end of each year, and the payments in liquidation of such balance, together with the final balance due from Ireland, cancelled in 1817 by the Act 57 Geo. 3, c. 48, as stated to the Irish Taxation Committee of 1864.

Appendix, No. 5—continued.

ABSTRACT ACCOUNTS of the JOINT EXPENDITURE of *Great Britain and Ireland*, for the Sixteen Years, from 5 January 1801 to 5 January 1817.

ESTIMATED JOINT EXPENDITURE, as stated in the several Annual Budgets.

YEAR.	IN EACH YEAR.			Proportions under Act of Union.		Ireland's Proportion, More or Less than Estimated Expenditure.

Appendix, No. 5—continued.

More just comparison by allowing for the following amounts.

Upon an examination of this account, it would at first appear that the total actual joint expenditure of the United Kingdom, 841,948,719*l.*, exceeded the estimated amount, 798,396,818*l.*, by the large sum of 43,551,907*l.* But this excess may be in a great measure accounted for by allowing for the several sums included in one of these amounts, and excluded from the other, by which process a more just comparison between the two amounts may be made. These sums are shown in the following accounts, in which the result upon the proportionate amount of contribution payable by Ireland is also shown.

I. Amounts included in finally settled, but not in estimated joint expenditure.

I. AN ACCOUNT of the AMOUNTS included in the ACTUAL JOINT EXPENDITURE as finally settled, but not included in the ESTIMATED JOINT EXPENDITURE.

Included in ACTUAL JOINT EXPENDITURE.

	In Great Britain.	In Ireland.	TOTAL.	Proportion of 2-17ths for Ireland.	Ireland's settled Proportion, more (+), or less (—), than the Actual Expenditure.

Balance of Excess in Actual Joint Expenditure - - - - - £. 41,579,006.

Total Reduction of Ireland's proportion of Actual Joint Expenditure, as compared with
Estimated Joint Expenditure - - - - - £. 5,674,087.

Appendix, No. 5—continued.

With these allowances the apparent excess of 43,551,907 *l.* in the Actual Joint Expenditure of the United Kingdom for the whole period of the 16 years, as finally settled, over the Estimated Amount, is thus reduced to 1,972,901 *l.* This is a remarkable approximation, considering the great difference in the amount of many of the years taken separately.

But a more important fact is proved by these accounts, in reference to the amount to be contributed by Ireland as her proportion of the joint expenditure of the United Kingdom. These two accounts distinctly show how favourable the mode of determining the joint expenditure to be apportioned between the two countries, as settled by the Committee of 1811, was to Ireland. Every point determined by the Committee was in favour of Ireland, and as the general result, she was thus relieved from a total liability of 5,674,087 *l.*, with which she had been, or would have been charged, according to the previously existing mode of estimating the joint expenditure.

It may appear to admit of doubt whether the decision of the Committee of 1811, by which they included some of these services in the joint expenditure, and excluded others, can be fairly justified upon strict investigation; and it may be observed that the Committee assigned no reasons for their decision, except in one instance, as to which, as will be shown, they evidently decided upon insufficient information.

Result of these allowances upon the comparison of estimated with finally settled joint expenditure.

Favourable result to Ireland of the principles adopted for determining the joint expenditure.

How far all these principles can be fairly justified.

1. As to the charges for management of revenue. Of these charges, which were so much larger in Ireland than in Great Britain, in proportion to the revenue collected, it can hardly be said that they properly formed part of the joint expenditure of the United Kingdom. They were incurred for collecting the revenue of each country, which was kept separate and distinct, and which was applicable both to the separate and to the joint expenditure of each kingdom, but in the first instance to the separate expenditure. The total amounts of such separate and joint expenditure actually defrayed in the 16 years were in the following proportions:—

1. As to management of revenue.

	In Great Britain.	In Ireland.	TOTAL.
	£.	£.	£.
Total separate expenditure - - -	539,686,862	62,969,548	602,656,410
Total actual joint expenditure - - -	761,933,735	80,014,984	841,948,719

Commons Paper, No. 513 of 1864, Appendix 10, p. 378.

The whole of the charges for management of revenue were however determined by the Committee to be joint expenditure.

2 The payments for inland navigation in Ireland were made under a grant of the Irish Parliament previous to the union, and as such were included in the separate expenditure of Ireland, in the several annual Budgets, until they were determined by the Committee of 1811 to be joint expenditure. They were also of the character of local and not Imperial expenditure. The only analogous expenditure during the period in Great Britain, was that for improving the Port of London, which was not included in the joint expenditure of Great Britain, and was in fact repaid by a local coal duty, known as the canal and dock duty.

2. Payments for inland navigation in Ireland.

3. The payments on joint expenditure in Great Britain for imprests, afterwards repaid, were excluded from the joint expenditure to which Ireland was called upon to contribute; but this regulation did not apply to similar payments to Ireland, although considerable sums were charged in her joint expenditure, which were afterwards repaid, either as imprests or advances on loan.

3. Payments for imprests afterwards repaid, in Great Britain only.

4. As to the deduction from the joint expenditure of Great Britain, in 1806, of a sum of 900,000 *l.*, as "being a grant of His Majesty out of droits for Naval services, and which should not therefore be charged in the joint account against Ireland." it appears that in that year, Ireland had already been credited with a sum of 117,647 *l.* British, as her proportion of two-seventeenths of the grant of 1,000,000 *l.* out of Admiralty droits, of which grant 900,000 *l.* was appropriated to Navy, and 100,000 *l.* to Ordnance expenditure. Had this fact been brought to the knowledge of the committee, it can hardly be doubted that the deduction of 900,000 *l.* from the joint expenditure of Great Britain would never have been made, nor Ireland have been twice credited with her proportion of this amount; and consequently that Ireland would have been duly charged with two-seventeenths of the sum, amounting to 104,833 *l.*

4. Navy payments out of Admiralty droits. Report 1864, Appendix 10, page 359. Report 1864, Appendix 20, page 438.

In addition to the advantage which Ireland thus received from the mode adopted of regulating the accounts of the joint expenditure, there were other large amounts with which it would appear that she might justly have been charged, not only in her separate expenditure as payments for the service of Ireland, and which, though thus chargeable to Ireland, were defrayed by Great Britain, but also in her proportion of joint expenditure, if fuller information had been laid before the several Committees.

Other amounts of expenditure defrayed by Great Britain, of which Ireland not charged her proportion, though fairly chargeable.

Appendix, No. 5—continued.

1. Discount on loans raised in England for service of Ireland.

Report 1864, Appendix 11, page 390.

1. The whole amount of discount for prompt payment of contributions to loans raised in England from 1801 to 1816 inclusive, partly for Great Britain and partly for Ireland, was charged to the separate account of Great Britain. The total sum so raised in the 16 years, all of which passed through the British Exchequer, was 292,300,000*l.* Of this sum 235,950,000*l.* was for the service of Great Britain, and 56,350,000*l.* for the service of Ireland. The total amount of discount so charged to the separate account of Great Britain was 2,791,551*l.* 15*s.* 2*d.*, including 176,672*l.* 18*s.* 9*d.* discount charged, in 1801, on the loan for the year 1800, of 20,500,000*l.*, of which 2,000,000*l.* was for the service of Ireland. No portion of this large amount so charged to the separate account of Great Britain was repaid by Ireland. There are, indeed, in the Expenditure Accounts of Ireland, from 1801 to 1816, considerable sums charged under the head of "Payments for the Separate Service of Ireland," for "discount on prompt payment of loan deposits, &c.;" but these payments consisted partly of discount paid in Ireland, and partly of other charges connected with Irish loans, such as commission, management, &c. If this sum of 2,791,551*l.* 15*s.* 2*d.* had been charged to the separate account of each country, in the proportion of the total amount of these loans raised for the service of Great Britain and Ireland respectively, Great Britain would have been charged 2,270,215*l.*, and Ireland 521,336*l.*

2. Charges of Irish loan of 1811.

2. Amongst these loans raised in England, the whole of the annual charge of which was, in the first instance, imposed upon Great Britain, was a loan of 12,000,000*l.*, in 1811, of which sum 4,500,000*l.* was for the service of Ireland. The annual charge for the portion of this loan raised for and applied to Ireland, was as follows:

	£.	s.	d.
Dividends on stock and Long Annuity	-	-	213,502 10 -
Sinking fund	-	-	63,544 3 2
Management	-	-	2,006 14 4
	£.	279,113	7 6

The whole of this annual charge was defrayed by Great Britain, no distinct provision for its payment by Ireland having been made in the usual manner by Parliament. It was, however, distinctly stated to Parliament that the charge so to be defrayed by Great Britain should be considered as a loan to Ireland. The circumstances were as follows:

Hansard, 20 May 1811.

In his Budget of 20 May 1811, the Chancellor of the Exchequer, Mr. Perceval, in relation to this Irish loan of 4,500,000*l.*, "stated he had no hesitation in saying that he trusted the Committee would agree with him in thinking that in the present distressed state of the Irish finances, it would not be wise or expedient to call on his honourable friend (the Chancellor of the Exchequer for Ireland) to lay taxes on that country for the purpose of meeting the expenses of the loan of 4,500,000*l.* raised in England. It was, therefore, his intention to propose to the English Members and the Irish Members of the House of Commons, that the expenses of that part of the loan raised for the service of Ireland should be charged on the Consolidated Fund of England, as a loan to Ireland, in order to procure the public creditor a permanent security, and for at least a twelvemonth, while an inquiry was making into the finances of that country, to bear the interest of the money so raised."

With respect to the annual charge of this loan of 4,500,000*l.*, and of other monies raised for the service of Ireland in 1811, Mr. Forster, the Irish Chancellor of the Exchequer, stated, in his Budget, the same day—

Hansard, 20 May 1811.

"It was not his intention, as his right honourable friend had already stated, to raise taxes in Ireland, under the present circumstances of that country, for the whole amount. The measure by which he was relieved from that necessity was a proof not only of great liberality, but of great wisdom; and as Ireland was a country of ample resources, they might look forward to a future period, when she would be able to discharge the obligation."

The charges on this loan were, however, paid by Great Britain up to the 5th January 1817, when the revenues of the two countries were consolidated, and no portion of the amount was repaid by Ireland.

Appendix C. to Report 1815.

Report 1865, Appendix 6, page 112.

The attention of Parliament was called to the circumstances of this Irish loan of 1811 by the Committees of 1812 and 1815, and the latter appended to their report an account of the charges up to 5th January 1815, showing an amount of 995,031*l.* sterling, "*then due thereon from Ireland to Great Britain.*" On 5th January 1817 this amount so due had increased to 1,553,258*l.*

3. Further joint expenditure out of gross revenue in progress to the Exchequer, for Civil Government, Scotland, &c.
513 of 1864, Appendix 10, p. 346.

3. It was shown to the Irish Taxation Committee of 1864, in a detailed account explanatory of the payments for national objects out of gross revenue of Great Britain, that large amounts of gross revenue so paid, as stated in the income sheet of the Annual Finance Accounts, were excluded in the expenditure sheet of the same finance accounts, from 1801 to 1816 inclusive, and were also excluded from the joint expenditure accounts appended to the Reports of the Committees of 1811 and following years, and which were based upon the expenditure sheet of the Finance Accounts. Of these amounts, after deducting sums imprested and afterwards accounted for as revenue advances, since repaid, as well as certain sums paid for quarantine works at Chesney Hill, chargeable as separate expenditure, and the peculiar expenditure under the head of "Woods and Forests," the following

Appendix, No. 5—*continued*.

following sums remain, which appear distinctly to form part of the joint Imperial expenditure, according to the principles laid down by the Committees:—

AN ACCOUNT of certain Sums included in the INCOME SHEET of the ANNUAL FINANCE ACCOUNTS of *Great Britain* (Class I.) from 1801 to 1816 inclusive, amongst the “Payments for National Objects out of Revenue in its progress to the Exchequer,” but excluded from the EXPENDITURE SHEET (Class V.).

It may be seen from the before-mentioned detailed account, furnished to the Irish Taxation Committee, that the payments for these Miscellaneous Services are partly for the Militia and partly connected with the management of revenue, that no sufficient reason appears for their being excluded from the Expenditure in the Finance Accounts, and that other similar payments were charged to the joint account. It may also be seen that no detailed information respecting the amounts of gross revenue applied to the payments for Civil Government (Scotland), which were excluded from the Expenditure Account, is to be found in the Finance Accounts. In order to obtain the information, it has been considered desirable to search the audited and declared accounts of the receivers of the several branches of Scotch revenue, and of the Paymaster of Civil Government in Scotland, now in the custody of the Queen's and Lord Treasurer's Remembrancer, and in the General Register House, in Edinburgh. This has now been done, under direction of the Treasury Board. From these, the most authoritative records, the cause of the apparent discrepancy between the several amounts of payments for services in Scotland, out of gross revenue, has been satisfactorily ascertained.

By the laws passed immediately after the Union with Scotland, the expenses of the Civil Government there were charged upon the Public Revenues of Customs and Excise, as well as upon the Hereditary Revenues of the Crown in Scotland. These Hereditary Revenues consisted principally of certain Customs duties, known as the “new subsidy,” and certain Excise duties, known as the “Hereditary and Temporary Excise,” as well as certain Customs and Excise fines and forfeitures. It should be observed that the Scotch Hereditary Revenues were specially reserved to the Crown, under the Civil List Act of George the Third. The total amounts of the gross revenues of Customs and Excise, including the Hereditary Revenues, which were imprested for payment of the charges of the Civil Government of Scotland, appear in the income sheet of the Finance Accounts, under the head of “Payments for National Objects.” In the expenditure sheet the *charge incurred*, not the amount of payments actually made, upon the Civil Establishment *payable out of the public revenues* of Customs and Excise, is alone stated; but neither the charge incurred nor the expenditure actually defrayed, *payable out of the Hereditary Revenues* also imprested, is included in the stated expenditure of the Civil Government of Scotland. A similar course is, in fact, followed in the expenditure sheet of the Finance Accounts, with respect to the Scotch Civil List Payments, as with those of the English Civil List; the total permanent annual charge of the Civil List establishment, *payable out of the public revenue*, is set down as the Civil List expenditure in the year.

The amounts so excluded were, nevertheless, quite as much a portion of the joint Imperial expenditure as those which were included. They were paid out of Customs and Excise

Appendix, No. 5—continued.

duties levied as taxes from the King's subjects in Scotland, and for expenditure for Civil Services in Scotland, in every respect analogous to similar expenditure, not only in Great Britain but also in Ireland, which was allowed to be joint expenditure, and of which both Great Britain and Ireland were called upon to contribute their respective proportions, under the Act of Union.

It is proper to add that out of the total amount so imprested for the Civil Government of Scotland, a portion was repaid into the Exchequer, at Westminster, as "Surplus Civil List (Scotland)," and made applicable, not to the public expenditure, but specially to the use of the Civil List in England. In the latter years of the period between 1801 and 1816 the amount was 10,000*l.* a-year; in the former part of this period its average annual amount was considerably less. As, however, the whole of the Civil List payments in Great Britain defrayed from the public revenue were taken to be joint expenditure, and as also a further amount of hereditary revenue arising from the Crown lands and casualties in Scotland, and nearly equivalent to the total of the surplus Civil List, Scotland, was also imprested for the Civil Government, in addition to the before-mentioned amounts of Customs and Excise, and was also excluded from the expenditure sheet in the Finance Accounts, and from the joint expenditure, it is evident that these surplus amounts need not be taken into account, so far as regards the question of the balance of joint expenditure due from Ireland.

It follows that Ireland should have been charged with her proportion of the further amount of 1,745,364 *l.*, joint expenditure thus defrayed in the 16 years by Great Britain, 2-17ths of which amounts to 205,337 *l.*

4. Loan to East India Company in 1810, set off as war expenditure in 1812.

Commons Paper, No. 116, of 1813.

4. In 1810, a loan to the East India Company of 1,500,000 *l.* in Exchequer Bills was authorised by Act 50 Geo. 3, c. 114. Of this sum 1,000,000 *l.* was advanced on 29 June 1810, and 500,000 *l.* on 11th January 1811. The principal and interest chargeable on the Bills were to be repaid by 1st January 1812; but no part was so repaid. By another Act, 52 Geo. 3, c. 10, all sums advanced by the East India Company for war, or other expenditure in the East Indies, were authorised to be carried to their credit, in repayment of the loan of 1,500,000 *l.*, as well as any sums paid by them into the Exchequer after 1st January 1812. Under this last provision, a sum of 88,000 *l.* was so paid in 1812; but it appears to have been taken in repayment of interest on the loan, and the whole of the principal of the loan of 1,500,000 *l.* was set off, in 1812, against the sums advanced for naval and war expenditure in the East Indies, the transaction being reported to Parliament in 1813. In the expenditure, as stated in the Finance Accounts, the sum of 1,500,000 *l.* appears only in 1810 and 1811, as a "Loan to the East India Company;" and it was charged to the separate account of Great Britain. It is clear that, in 1812, it should have appeared first on the income side, as a repayment of the loan, and again, on the expenditure side, as a payment to the East India Company for war expenses; and that it should have been included in the Joint Expenditure Account, and 2-17ths, or 176,470 *l.* charged against Ireland.

Consequent increase of balance due from Ireland and Great Britain.

To recapitulate. These four additional sums, thus shown to be fairly chargeable to Ireland, are as follows:—

	£.
1. - - - - -	521,336
2. - - - - -	1,553,258
3. - - - - -	205,337
4. - - - - -	176,470
TOTAL - - - £.	2,456,401

With the addition of this further amount, thus due from Ireland to Great Britain, the total balance owing to Great Britain of 2,001,458 *l.*, stated to have been cancelled by the Act 57 Geo. 3, c. 48, would be increased to 4,457,859 *l.*

Proportion of revenue of Great Britain from territorial dependencies, to be credited to Ireland.

On the other hand, there remains an amount which should fairly be placed to the credit of Ireland. In the seventh article of the Act of Union it is provided, that from and after 1st January 1801 all public revenue arising to the United Kingdom from the territorial dependencies thereof, and applied to the general expenditure of the United Kingdom, shall be so applied in the proportion of the respective contributions of the two countries.

The attention of the Committees from 1811 to 1815 does not appear to have been directed to this provision, but reference is made to it in the Report of the Committee of 1865, and to the evidence that Ireland was never credited with her proportion of any revenue thus received.

What revenue to be so apportioned.

The only revenue received in Great Britain from her territorial possessions which was applicable to the general expenditure during the 16 years, from 5 January 1801, was that arising from the Plantation duties, and stated in the Annual Finance Accounts amongst the detailed Customs duties, as "Remittances from the Plantations." These duties were originally imposed in the time of Charles II., and were made part of the aggregate fund by the Act 1 Geo. 1, stat. 2, c. 12, in 1714. Additional duties were imposed in 1733, by the 6 Geo. 2, c. 13. The Plantation duties were avowedly imposed for the purpose of commercial regulation, and as protective duties. They became part of the Consolidated

Appendix, No. 5—continued.

Consolidated Fund in 1786, and their produce was included in the Customs' receipts until 1848, when they ceased to be paid into the British Exchequer, under the operation of the Acts 8 & 9 Vict. c. 84, and 9 & 10 Vict. c. 94.

These Plantation duties having been granted prior to 1778, were exempted from the operation of the Act 18 Geo. 3, c. 12, passed in that year, by which it was enacted that Parliament would thereafter impose no duties on the Colonies, except for the regulation of commerce; the net produce of such duties to be always applied for the use of the Colony in which the same should be levied.

The total amount of the Plantation duties received at the Exchequer in 15 out of the 16 years ending 5th January 1817 (and excepting 1813-4), was 524,123*l.*; the average amount for each year being 34,941*l.* The detailed Customs receipts of the year 1813-4 cannot be stated, as all the documents were destroyed by a fire at the Custom-house (*see* Finance Accounts 1814, p. 5). Assuming the above stated average amount of 34,911*l.* to have been received in that year, the total receipt of the 16 years would amount to 559,064*l.*, 2-17ths of which, or 65,772*l.*, should have been credited to Ireland.

After deducting the sum of 65,772*l.* from the previously stated balance of 4,457,859*l.*, this net balance owing from Ireland to Great Britain, upon the joint expenditure account, would thus appear to be reduced to 4,392,087*l.*

Its amount in the 16 years.

Result on net balance due from Ireland upon the joint expenditure account.

EXPLANATION OF APPARENT DISCREPANCIES BETWEEN ANNUAL FINANCE ACCOUNTS AND THE BALANCED ACCOUNTS, NOW PREPARED.

It has been stated that the Accounts of the joint Expenditure, both in Great Britain and in Ireland, as finally settled, were based upon the Accounts of Expenditure, as shown in the Annual Finance Accounts. It was, however, stated in the evidence brought before the Irish Taxation Committee of 1864, that the mode in which the Accounts both of Income and of Expenditure of Great Britain were made up in these Annual Finance Accounts previously to 1822, not only does not admit of an accurate Balance Sheet being struck between the Receipts and Payments, including Balances, but that, in point of fact, a comparison between them for the whole period of the 16 years ending on 5th January 1817, shows an apparent excess of the amount of Payments over Receipts, including Balances, of no less a sum than 15,319,527*l.* 10*s.* 1*d.* This excess appears with reference only to the *Net* Receipts into, and Issues from, the Exchequer at Westminster.

Apparent excess of payments over receipts of Great Britain, from 1801 to 1817, in Annual Finance Accounts, upon which the accounts of joint expenditure were based.

Report 1864, Appendix 13, p. 384.

It would necessarily follow from this apparent excess of Payments, that a corresponding discrepancy would appear to exist between the amounts of Income and Expenditure of Great Britain, as shown in the several Annual Finance Accounts and in the Balanced Accounts for the same period, as stated in the preceding Return III., pp. 359-391.

Corresponding apparent discrepancies between the annual Finance Accounts of Great Britain, and the balanced accounts now prepared.

No discrepancy in the Irish accounts.

No such discrepancy exists in the Accounts of Income and Expenditure of Ireland, these Accounts, as prepared and returned to Parliament, having from the earliest period been kept on the true principle of a Balance Sheet.

An explanation of the differences between the amounts stated in the Annual Finance Accounts and in the Balanced Accounts, and of their causes, will also serve to show how this apparent excess of Payments over Receipts has arisen. This explanation is to be found in the Report to Parliament of the Select Committee of 1822, on the Public Accounts annually laid before Parliament.

Explanation as to Finance Accounts to be found in Report of Committee of 1822. No. 618, of 1822.

Previously to 1822, no general Balance Sheet of the Public Income and Expenditure of Great Britain appears to have been prepared in the Finance Departments, and laid before Parliament. A balance sheet of the Net Public Income and Expenditure of the United Kingdom for the year ending 5th January 1821 was prepared and submitted to the Committee of 1822, and their attention was at once directed to the differences which appeared to exist between this Balance Sheet and the Finance Accounts, as well as to some apparent errors in the annual Finance Accounts. Upon both these points a satisfactory explanation was given to the Committee, and they appended to their Report two Accounts, showing the Amount of difference under each head, both of Income and Expenditure, and the causes of difference.

Differences satisfactorily explained.

Report 1822, Appendix, No. 51, 86, and No. 52, p. 88.

The Committee found that those differences and those errors were chiefly the result of a defect in the principles upon which some part of the Annual Finance Accounts had hitherto been constructed. No specific form of account had been prescribed in the Act of 1802, 42 Geo. 3, c. 70, under which those accounts were prepared. The principal and most prominent defect was, that they neither did nor could exhibit any balance between the Income and Expenditure of the year. The Income side showed the amount collected and amount paid into the Exchequer within the year. The Expenditure sheet was not based upon the same principle; and with respect to some of the chief heads of service, such as the Army and Ordnance, and Interest on Exchequer Bills, instead of stating the Amount of Issues from the Exchequer, it gave the Amount of Payments by the distributing officers.

Causes of differences in defective form of the Finance Accounts up to that period, Report 1822, p. 3.

Appendix, No. 5—continued.

The Accounts of Income and of Expenditure were, therefore, accounts of different kinds, and no true balance could be struck by comparing them together.

Improved form of annual Finance Accounts, recommended by the Committee of 1822,

The Committee consequently recommended several alterations and improvements in the form of the Annual Finance Accounts, so as in future to prevent these discrepancies from arising, and that accurate balance sheets of the Public Income and Expenditure should be annually prepared and submitted to Parliament. With this object, they considered that the Expenditure side should show the Issues made from the Exchequer, and not the payments by the distributing officers, and would thus tally with the statement on the Income side, of sums paid into the Exchequer during the year.

and since adopted.

In pursuance of this recommendation, the Annual Finance Accounts were thenceforward prepared in the form approved by the Committee of 1822.

Summary of deficiencies in the Accounts for 1820-1, submitted to Committee of 1822.

It may afford sufficient explanation of the differences between the amounts in the Annual Finance Accounts and in the Balanced Accounts, to give, as an illustration of similar differences, the following summary of those in the several accounts of Public Income and Expenditure for the year ending 5th January 1821, which were submitted to the Committee of 1822.

As respects income.

The Income in the Balanced Account included the following sums, which were not included in the Finance Accounts:

£.19,000, received as part of the proceeds of the Lottery. This sum was paid for Incidental Expenses, and was so charged in the Expenditure in the Finance Accounts, but was not included in the "Net Receipt upon Lottery, after payment of Prizes," as it was not actually received into the Exchequer:

£.260,000 for old Naval Stores, this sum also not having been received into the Exchequer:

£.52,993. 6s. 4d., the produce of the 4s. tax on Pensions, and 417l. 10s. 4d. Fines and Forfeitures, omitted in the Finance Accounts. This appears to have been an accidental omission, which could not have occurred if the amounts on the two sides of Income and Expenditure had been duly balanced.

As respects expenditure

The principal differences in the Expenditure were as follows:

The Army Expenditure in the Finance Accounts was *less* than in the Balanced Account by 14,930l. 11s. 4d.:

The Ordnance was *more*, by 309,293l. 1s. 2d.:

Interest on Exchequer Bills, *less* by 166,397l. 9s. 9d.

These differences were principally caused by the Finance Accounts showing, as has been already stated, the Expenditure according to the payments by the distributing officers, and the Balanced Accounts the Expenditure according to the issues from the Exchequer.

A further difference in the amount of the Consolidated Fund Services, other than for the Public Debt and Civil List, resulted from the *charge* for these services being stated in the Finance Accounts, whilst the *actual expenditure* was shown in the Balanced Account. The *charge* for the Civil List, and not the *actual expenditure*, was given in both Accounts, the Civil List and other similar specially appropriated Balances being excluded from the stated Balances in the Exchequer.

Special payment by East India Company.

A sum of 156,906l. 18s. 6d. was included in the Expenditure in the Finance Accounts, under the head of "Payments by the East India Company," but not in the Balanced Account, as not having been issued from the Exchequer. This amount of Public Expenditure defrayed by the East India Company was credited to them in their current account with the British Treasury; but it does not appear *per contra* on the Income side in the Finance Accounts, where it must have found place if the accounts had been duly balanced.

Produce of old Navy and Ordnance stores.

With respect to the produce of the sale of Old Stores, it appears to have been the practice at that period (1822) to vote the full amount of the Navy Estimates without any deduction for the amount to be defrayed from the produce of Old Naval Stores, which was taken as part of the Ways and Means of the year. In the Finance Accounts, the proceeds of Old Naval Stores were not included in the Income, their amount not having passed through the Exchequer; but so much less was issued from the Exchequer on the Navy Grant, than was paid by the Naval departments.

Report 1822, p. 9.
Report 1822, Appendix, p. 87.

Report 1822. p. 9.

The produce of Old Ordnance Stores was deducted in the Annual Estimates from the sum required to be voted by Parliament. The amount of such produce not passing through the Exchequer was not included in the Income, as stated in the Finance Accounts. But Ordnance Expenditure in the same accounts, being not the issues from the Exchequer for Ordnance Services, but the payments by the Treasurer of the Ordnance, necessarily included the whole of such payments which were made out of the produce of Old Stores.

Navy bills and Ordnance debentures.

The established practice of making large payments in every year for Navy and Ordnance Services, by Navy Bills at 90 days' date, carrying interest, and by Ordnance Debentures, tended also to cause a considerable difference in any given year, between the Amount issued from the Exchequer for these services respectively, and the amount of payments by the Departmental officers.

There

Appendix, No. 5—continued.

There was another cause of difference arising from the period to which the Accounts of the Expenditure for Army, Navy, and Ordnance were made up. In the detailed Accounts of Expenditure appended to the Finance Accounts,—

Difference of periods to which the expenditure was made up.

The payments for Army Services by the Paymaster General are stated to be made in the year ending 25th December :

The payments for Navy Services by the Treasurer are stated to be made for the year ending 5th January, but they include large amounts paid by bills at 90 days' date :

The payments for Ordnance Services by the Treasurer of the Ordnance are stated to be for the year ending 31st December, to which period the Annual Grant to the Ordnance was voted.

In each of these cases the period of the Expenditure, as stated in the Finance Accounts, differs from that in the Balanced Accounts, which are made up to 5th January in each year ; for each year taken separately the difference might amount to a considerable sum, although for a number of years taken together this difference would be nearly equalised.

Without going into further details, this explanation of the differences in the amounts for the single year ending 5th January 1821, may be a sufficient illustration of the differences which must necessarily exist between the amounts of Public Income and Expenditure in the Annual Finance Accounts and in the Balanced Accounts, for the several preceding years up to that period, which were made up on the same principles as those of the year 1820-21.

This illustration sufficiently explains the differences between Finance Accounts and Balanced Accounts.

With respect to any accidental errors or omissions which may be met with in the Annual Finance Accounts up to 1822, such as those to which the Committee of that year referred in their Report, and which were attributable to the imperfect system adopted up to that period, no security being afforded for the accurate insertion of every amount on both sides of the account by striking a balance between them, it may be added that certain amounts, both on the Income and on the Expenditure side, although they were received and paid at the Exchequer, were designedly omitted in the Annual Finance Accounts, as being specially appropriated and not considered as part of the Public Income and Expenditure, or at the disposal of Parliament. For instance, the extra receipts of the Civil List, appropriated to the Civil List Expenditure ; First Fruits and Tenths, appropriated to Queen Anne's Bounty for augmentation of Poor Livings ; Canal and Dock (Customs) Duties, appropriated to the discharge of special advances out of the Public Revenue for local purposes ; &c. There appears, however, to have been no fixed rule for the omission of such amounts, and they are occasionally stated in the Finance Accounts as part of the Public Income and Expenditure. The customs duties known as the 4½ per cent. duties are in every year included in the Income, whilst the Expenditure to which they were specially applied is in every instance omitted on the Expenditure side.

Errors or omissions in annual Finance Accounts up to 1822.

This explanation of the system upon which the Annual Finance Accounts previously to 1822 were made up is equally applicable to the several accounts from time to time prepared and returned to Parliament, and which were based upon the Finance Accounts. Amongst these Returns, reference may be especially made to the accounts of Gross and Net Revenue of the United Kingdom in each year from 1802 to 1842, in which the amounts of Public Receipt in Great Britain and in Ireland are separately distinguished.

Explanation equally applicable to other accounts and returns based on the Finance Accounts, prior to 1822.

Commons Paper, No. 209, of 1843.

Attention may also here be called to the Balanced Accounts of the Net Public Income and Expenditure of the United Kingdom, from 1792 to 1828, prepared for the Finance Committee of 1828, and appended to their Fourth Report ; as well as to similar Balanced Accounts of Irish Income and Expenditure appended to the Report of the Committee on the State of the Poor in Ireland in 1830. No other Balanced Accounts of the Annual Public Income and Expenditure, prior to 1822, have been hitherto prepared and returned to Parliament, nor has any separate Balanced Account of the Annual Public Income and Expenditure of Great Britain up to the same period been furnished. The above-mentioned Balanced Annual Accounts, from 1792 to 1828 and 1830, were prepared from the same financial books and documents as the Balanced Accounts now made out and contained in the preceding pages, so far as these last relate to the *Net* Income and Expenditure. To this extent, therefore, they ought substantially to agree ; that is to say, excluding from both sides the amounts of revenue applied to the costs of collection, and to the payments for national objects out of gross revenue in its progress to the Exchequer, the separate accounts for Ireland should agree, and the separate accounts for Great Britain now prepared should agree with the accounts of the United Kingdom, after deducting the separate amounts for Ireland.

Balanced annual accounts from 1792 to 1828, appended to reports of Finance Committee, 1828, and Committee on Irish Poor, 1830.

Commons Paper, No. 519, of 1828, and 667, of 1830.

But if the attempt be made so to reconcile them, many apparent discrepancies will still be found. The following explanation may be given of those apparent discrepancies. The Balanced Accounts from 1792 to 1830 were made up on the same principle as the Balanced Account for the year 1821, submitted to the Committee in 1822, in which—

Explanation of apparent discrepancies between such balanced accounts and those now furnished.

(1.) Certain specially appropriated heads of receipt, before referred to, and the expenditure defrayed from them, were omitted.

(2.) The annual charge for the Civil List was substituted for the Annual Expenditure.

Appendix, No. 5—*continued.*

(3.) The balances on these several specially appropriated heads, remaining at the beginning and end of the year, were excluded from the stated Balances in the British and Irish Exchequers.

(4.) The amounts *actually applied by the distributing officers* to pay off Exchequer Bills, and to pay interest of such Bills, were substituted for the amounts issued from the Exchequer, and *directed to be applied* for these several services.

(5.) The Balanced Accounts from 1792 to 1828, following the practice of the Annual Finance Accounts, also include, in the Total Expenditure of the Miscellaneous Supply Grants, both the amount of sums replaced to the Civil List for advances previously made for Supply Services, and also the sums voted towards the arrears or deficiency of the Civil List. Although the sums so replaced were merely transferred in the Exchequer books, they could be brought in no other way into the Expenditure, the amount stated as the Civil List Expenditure being, as before stated, only the permanent annual charge. But in the Balanced Accounts as now made up the total amounts of the actual annual expenditure of the Civil List are stated under the several classes and according to the issues from the Exchequer, and include, under the head of "Contingent and Occasional Payments," the sums so advanced for Supply Grants, which are not separately distinguished under this head in the annual revenue books, as well as the expenditure out of the Special Grants for Arrears or Deficiencies. The amounts of the sums *replaced to the Civil List in each year*, from 1801 to 1816 inclusive, and the details, arranged in classes, according to the present practice, are shown in Appendix 5. The amounts of the actual expenditure out of any special grants for Arrears or Deficiencies are specified in the Balanced Accounts of Great Britain for the same period, when showing the Total Civil List Expenditure.

In the accounts for the United Kingdom, appended to the Report of 1828, the receipts and payments in each year between the two Exchequers were also excluded; such as the amounts remitted from the British to the Irish Exchequer on account of that portion of the loans raised through the British Exchequer which was for the service of Ireland, and the quarterly amounts remitted from the Irish to the British Exchequer to defray the charges of the Irish portions of these loans, which were payable through the British Exchequer, such amounts being necessarily included on both sides of the separate accounts for Great Britain and for Ireland respectively. With this explanation, and allowing also for the different and more comprehensive arrangement of the Balanced Accounts of Gross Income and Expenditure now prepared, they will be found to agree substantially with the Balanced Annual Accounts returned to Parliament in 1828 and 1830.

RESULT OF THIS EXPLANATION UPON THE ACCOUNTS OF THE JOINT EXPENDITURE.

Further explanation
as to apparent excess
of payments over
receipts, 1801-17.

It remains only to apply the explanation thus far given, of the mode in which the statements of Public Income and Expenditure were made up in the Annual Finance Accounts, to the apparent excess of payments over receipts, shown in these Finance Accounts, for the whole period of the 16 years ending 5th January 1817, amounting, as already stated, to 15,319,527*l.* 10*s.* 1*d.*, and to point out what may be the result, if any, upon the amount of Joint Expenditure of Great Britain, of which Ireland was called upon to contribute her proportion under the Act of Union.

Now required only
as affecting the
accounts of joint
expenditure.

It would be a very laborious, as well as unprofitable task at this distance of time, to attempt to reconcile in detail this large apparent excess of payment in Great Britain during these 16 years. Such difference would inevitably arise from the system upon which the Annual Finance Accounts were then made up, and by which those sums only which were paid into the Exchequer were included on the receipt side, whilst on the expenditure side other payments were included which had been defrayed out of moneys not passed through the Exchequer. One single instance may be adduced as an illustration. In 1806, a sum of 1,000,000*l.* was appropriated by the Sovereign out of Admiralty Droits to the public use, and was actually applied, 900,000*l.* for the Navy and 100,000*l.* for Ordnance. As this sum of 1,000,000*l.* was not paid into the Exchequer, having been applied directly by the Naval Department, it does not appear on the Income sheet of the Finance Accounts, although the whole sum is included in the expenditure by the Navy and Ordnance Departments. It may be sufficient, therefore, to limit any further explanation to the effect of this apparent excess of payments upon the accounts of Joint Expenditure, and upon the consequent amount of Ireland's contributions.

Appendix, No. 5—continued.

It is obvious that this apparent excess of payments would not affect the proportionate amount of joint expenditure to be contributed by Ireland, except in the event of its having been caused by payments made out of monies which did not pass through the British Exchequer, including departmental repayments, to her proportionate share of which Ireland was entitled, but with which she was not credited. In all such cases Ireland could fairly have demanded either to have her proportion of such monies remitted to her, or that the whole amount of payments out of such monies should be deducted from the joint expenditure before she was charged with her proportion. The only portion of the joint expenditure in which such a contingency could arise would be in the payments for Army, Navy, and Ordnance Services. It could not arise in the Miscellaneous Supply Services for a period of several successive years, as the expenditure for those services in the Annual Finance Accounts is checked and balanced by comparison with the several annual grants, and could be defrayed only by issues from the Exchequer.

And practically limited to the expenditure for Army, Navy, and Ordnance Services.

The following Abstract Account shows a comparison of the several and total amounts of Expenditure in Great Britain for Army, Navy, and Ordnance Services in each of the 16 years up to 5 January 1817, as stated in the Annual Finance Accounts, and in the Balanced Accounts now prepared, together with a comparison of the total amounts for the whole period. In order to make a just comparison, the amounts of gross revenue applied to Army Expenditure, and of old naval stores applied to Navy Expenditure, are deducted from the payments for Army and Navy Services, as shown in the Balanced Accounts, as they are not included in the stated expenditure for those services in the Finance Accounts; the similar amounts paid for Army and Navy prize money are also deducted, as they are included in the Miscellaneous Supply Services in the Finance Accounts.

Comparative abstract account of the expenditure for these services, as stated in the Annual Finance Accounts, and in the Balanced Accounts now prepared.

COMPARATIVE ABSTRACT ACCOUNT of the EXPENDITURE for ARMY, NAVY, and ORDNANCE SERVICES, as stated in the ANNUAL FINANCE ACCOUNTS, and in the BALANCED ACCOUNTS now prepared.

Result of this comparison.

The result of this comparative account is thus shown to be that, for the whole period of the 16 years, the total expenditure by the Army, Navy, and Ordnance Departments, as stated in the Finance Accounts, appears considerably greater than the total expenditure, for the same services, according to the Exchequer Issues. This difference is caused by the defective form of the finance accounts up to 1822, and is to be accounted for by the explanations given in the report of the Committee of 1822, already referred to. It could not have occurred, or would have been more satisfactorily accounted for, had a *balanced* account been then kept.

Ireland credited with her proportion of the apparent excess of expenditure, as stated in the Finance Accounts.

It should be borne in mind that Ireland was charged with her proportion of 2-17ths of the Total Expenditure for Army, Navy, and Ordnance services, amounting to 670,622,160 *l.*, as stated in the Finance Accounts, and which was taken to be joint expenditure, with the exception only of 17,803,940 *l.*, charged to the separate account of Great Britain, as having been incurred before the Union, or otherwise not belonging to the joint charge. As, however, there is no direct proof that the above-mentioned apparent excess of 8,198,054 *l.*, in this expenditure, as compared with the Exchequer Issues, was actually paid

Appendix, No. 5—continued.

paid by Great Britain out of her Revenue, and in the absence of any satisfactory data for ascertaining its exact particulars, it might perhaps be urged on behalf of Ireland that 2-17ths of its amount, or 964,476 *l.*, should be credited to her.

Should it be so urged and allowed, and this sum be deducted from the previous stated balance of 4,392,087 *l.*, it would consequently remain as a final result that 3,427,611 *l.* was the amount of the net balance owing from Ireland to Great Britain, cancelled in 1817, under the Act 57 Geo. 3, c. 48.

Consequent and final result of net balance due from Ireland cancelled 57 Geo. 3, c. 48.

From the explanation thus given of the mode of carrying into effect the provisions of the Act of Union relating to the settlement of the joint expenditure of the United Kingdom, during the period of its apportionment between Great Britain and Ireland, the conclusion may fairly be drawn, without reference to the question whether the proportion required by the Treaty of Union to be contributed by Ireland was just and according to her relative ability, that the provisions of the treaty, so far as they were applicable to the mode of adjusting the joint accounts, were construed by the several Parliamentary Committees, and the actual settlement of the accounts was effected, upon principles the most favourable to Ireland.

Conclusion.

That such principles were then generally acted upon in the Imperial Parliament may be seen from the following testimony, borne by one who had himself been one of the ablest and leading opponents of the Union in the last Irish Parliament. In the debate in the House of Commons on 22 April 1822, upon Sir John Newport's motion relating to the condition of Ireland, Mr. (afterwards Lord) Plunkett, said:

"I had been afraid that the interests of Ireland, on the abolition of her separate legislature, would come to be discussed in a hostile Parliament. But I can now state, and I wish when I speak that I could be heard by the whole of Ireland, that during the time that I have sat in the United Parliament, I have found every question that related to the interests or security of that country, entertained with indulgence and treated with the most deliberate regard."

Hansard; and Life of Lord Plunkett, vol. 2, p. 105.

Again, in the debate in the House of Lords on 10 June 1828, upon the Roman Catholic claims, Lord Plunkett stated:

Ibid. p. 257.

"I thought in the year 1800, that the Union was a measure of party; that it would not be acted on fairly, and that the inferior country would be obliged to suffer without redress. I have been most happily disappointed. I know of no instance in which, when the interests of Ireland have been brought under the consideration of the Imperial Parliament, those interests have not been attended to with justice, with favour, and almost with partiality."

It thus appears that at the period when the provision in the Act of Union for apportioning the joint expenditure ceased, a considerable balance was due to Great Britain from Ireland upon the joint expenditure account, which Ireland was never called upon to pay; that the balance so due was cancelled by Parliament without any statement of its actual amount, and without any final settlement of the accounts between the two countries; and that, so far as can now be ascertained upon the closest investigation, the amount of the final balance due from Ireland to Great Britain, which was cancelled in 1817 by the Act 57 Geo. 3, c. 48, may be stated at not less than 3,427,611 *l.*

Chief Clerk,

Appendix, No. 6.

TABLE of approximate DATES, as nearly as can be ascertained, of the Beginning and End of the several WARS, and NAVAL and MILITARY OPERATIONS, in which this Kingdom has been Engaged since 1688.

Date of Beginning of War, &c.	EVENTS.	Date of End of War, &c.
1689 - 7 May -	War declared against France.	
1702 - 4 May -	Treaty of Peace at Ryswick - - - - -	10 September 1697
	War declared against France and Spain (Spanish Succession).	
	Treaty of Peace with France, at Utrecht - - -	14 March - 1713
	Treaty of Peace with Spain, at Utrecht - - -	13 July - 1713
1715 - 18 May -	Naval Operations in the Baltic against Sweden.	
	Terminated by death of Charles 12th, King of Sweden	30 November 1717
1718 - 4 June -	Naval Operations in Mediterranean against Spain.	
1718 - 16 December	War formally declared against Spain.	
	Treaty of Peace at Madrid - - - - -	13 June - 1721
1726 - 24 March -	Naval Operations in the Baltic against Russia, and in West Indies against Spain.	
	Preliminaries of Peace with Spain - - - - -	31 May - 1727
	Treaty of Peace between Great Britain, France, and Spain, at Seville.	9 November 1729
1734 - 28 March -	Augmentation of Army, and	
1735 - June -	Naval Operations in aid of Portugal.	
	Treaty of Vienna - - - - -	15 March - 1737
1738 - May -	Naval Operations in Mediterranean against Spain.	
	Convention with Spain at the Pardo - - -	14 January - 1739
1739 - 19 October -	War declared against Spain (Right of Search).	
1742 - 2 April -	Message to Parliament, for engaging in War of Austrian Succession.	
1744 - 31 March -	War declared against France.	
	General Treaty of Peace with France, the States General, &c., at Aix-la Chapelle.	18 October - 1748
1754 - 14 November	Augmentation of Forces and approaching rupture with France; Military and Naval Operations in North American Colonies.	
1756 - 17 May -	Formal declaration of War against France (Seven Years' War).	
1762 - 2 January	And with Spain.	
	General Treaty of Peace with France, Spain, and Portugal, at Paris.	10 February - 1763
1775 - 17 June -	Hostilities commenced with North American Colonies.	

Appendix, No. 6—*continued*.

Date of Beginning of War, &c.	EVENTS.	Date of End of War, &c.
1778 - 6 February	War with France. (Date of Treaty of Alliance between France and United States.)	
1779 - 17 June -	Message to Parliament of War with Spain.	
1780 - 20 December	Manifesto of War with Holland.	
	Preliminary Treaty of Peace with France and Spain, at Versailles - - - - -	20 January - 1783
	General Treaty of Peace with United States of America, France, and Spain - - - - -	3 September 1783
	Definitive Treaty of Peace with Holland - - -	20 May - 1784
1793 - 1 February	War declared by France (War of the French Revolution).	
	Treaty of Peace at Amiens - - - - -	27 March - 1802
1796 - 5 October	War declared by Spain.	
	Ended by Declaration in King's Speech - - -	4 July - 1808
1803 - 18 May -	War declared against Buonaparte.	
	Finally ended by Treaty of Paris - - - - -	20 November 1815
1807 - 16 August -	Hostilities proclaimed against Denmark.	
	Treaty of Peace with Denmark, at Kiel - - -	14 January 1814
„ - 31 October	War declared by Russia.	
1810 - 7 November	War declared by Sweden.	
	Treaty of Peace with Russia and Sweden, at Orebro	18 July - 1812
1812 - 18 June -	War declared by United States of America.	
	Treaty of Peace at Ghent - - - - -	24 December 1814
1826 - 11 December	Aid to Portugal against hostile aggression by Spain.	
	King's Speech.—Troops ordered to be immediately withdrawn - - - - -	29 January - 1828
1827 - 6 July -	Treaty for Pacification of Greece, and instructions to Admirals of combined Fleets in the Mediterranean.	
	Naval operations terminated by Battle of Navarino -	20 October - 1827
1840 - 3 April -	Order in Council to seize Chinese vessels; naval and military force sent to China

PART II.

UNITED KINGDOM.

Accounts of Gross Income and Expenditure - - - - - 1801—1869.

(With Abstract and Subsidiary Accounts, and Explanatory Notes.)

CONTENTS.

PART II.

PUBLIC INCOME and EXPENDITURE of the UNITED KINGDOM, 1801 to 1869.

- I.—Accounts of the GROSS Public Income and Expenditure of the United Kingdom, deducting Drawbacks, Repayments, &c., and Bounties of the nature of Drawbacks, and of the Gross Public Expenditure, including Payments out of Gross Revenue, in progress to the Exchequer, for Collection of Revenue, and other National Objects, for each Financial Year from 5th January 1801 to 31st March 1869; and of other Receipts into and Issues from the Exchequer, distinguishing Amounts raised by Creation of Debt, and Amounts applied to Reduction of Debt; showing also the Balances in the Exchequer at the Beginning and End of each Year - - - - - p. 8 to p. 145
- II.—Details of Miscellaneous Receipts of Gross Revenue, in each Financial Year from 31st March 1856 to 31st March 1869 - - - - - p. 146-7
- III.—General Abstract of the preceding Accounts of Gross Public Income and Expenditure of the United Kingdom, 1801 to 1869 inclusive - - - - - p. 148 to p. 152

Appendix 1.—Gross Revenue received and applied, in progress to the Exchequer.—Abstract Account of such Amounts of Gross Revenue received, as were applied, in progress to the Exchequer, to Payment of Costs of Collection and Management of Revenue, and to other Payments for National Objects, in each Financial Year from 1801 to 31st March 1857, when such Payments out of Gross Revenue ceased; including also, in Costs of Collection and Management, and distinguishing, certain Sums issued from the Exchequer out of the Receipts from Land and Assessed Taxes, to Receivers of those Duties in each Financial Year from 1801 up to 1825, when such Issues ceased - p. 153 to p. 166

Appendix 2.—Gross Revenues of Crown Lands, &c.—Abstract Accounts of the Gross Revenues of Crown Lands and Woods and Forests in the United Kingdom (exclusive of Amounts contained in Appendix 3); of Sums applied out of such Gross Revenues in progress to the Exchequer, for Costs of Collection and for other Payments, distinguishing the Amounts of the several Heads of such other Payments; and of Net Payments into the Exchequer, together with Balances remaining, in each Financial Year from 5th January 1801 to 31st March 1869, viz.:

- I. Abstract Account of the Gross Revenues of the Crown Lands in England and Wales, and their Application, in each Financial Year from 5 January 1801 to 5 January 1822, as shown in the Annual Finance Accounts; the Produce of Sales of Estates, and the Revenue of the Royal Forests, and their Application, not having been included - p. 168
- II. Abstract Account of the Produce of Sales of Estates and other Portions of the Crown Lands, &c., showing the Amount received and applied, in each Financial Year from 5 January 1801 to 25 March 1830, as shown in Parliamentary Return, No. 128 of 1831, p. 862; and to 31 March 1848, as shown in No. 574 of 1849, p. 166 - - - p. 169
- III. Abstract Account of the Gross Revenues of the Crown Lands, Woods, and Forests, in the United Kingdom, and the Application thereof, in each Financial Year from 5 January 1822 to 5 January 1848; as shown in the Annual Finance Accounts, the Capital Account not having been distinguished from the Income and Expenditure Account - - - p. 170
- IV. Income and Expenditure Account.—Abstract Account of the Gross Revenues of the Crown Lands, Woods, and Forests, in the United Kingdom, and the Application thereof, in each Financial Year from 5 January 1848 to 31 March 1869; as shown in the Annual Finance Accounts - - - - - p. 172
- V. Capital Account (Cash).—Abstract Account of the Produce of Sales, Exchanges, &c., of Estates and other Portions of the Crown Lands in the United Kingdom, and of the Application thereof, in each of the 21 Financial Years ended 31 March 1869; as shown in the Annual Reports of the Commissioners of Woods, &c., laid before Parliament - p. 173
- VI. Capital

Appendix 2.—Gross Revenues of Crown Lands, &c.—*continued.*

- VI. Capital Account (Stock).—Abstract Account of the Amount of Capital Stock, and other Securities Purchased and Sold on account of Sales, Exchanges, &c., of Crown Lands, in each of the 21 Financial Years ended 31 March 1869; together with the Balances of such Stock and other Securities held at the beginning and end of each Year; as shown in the Annual Reports of the Commissioners of Woods, &c., laid before Parliament - p. 174
- VII. Expenditure out of Public Revenue, formerly charged on Gross Revenues of Crown Lands.—Abstract Account of Expenditure out of Public Revenue, for Royal Palaces, Royal Parks, and for Salaries and Expenses of the Office of Woods and Office of Works, in each Financial Year from 5 January 1852 to 31 March 1869, as shown in the Annual Finance Accounts; the provision for such Expenditure having been transferred from the Gross Revenues of Crown Lands to Parliamentary Grants out of the Public Revenue - p. 174

Appendix 3.—Crown Lands, &c. in Ireland.—Abstract Account of the Amounts of Quit Rents and other Revenues of Crown Lands in Ireland, under the Management of the Commissioners of Excise, and included in the Gross Receipts of Excise, &c., Ireland, for each Financial Year from 5th January 1801 up to 5th July 1827, when the Management of the Crown Lands in Ireland was transferred from the Board of Excise to the same Management as the Revenues of Crown Lands in England, per 7 & 8 Geo. 3, c. 68 - - - - - p. 175

Appendix 4.—Civil List Receipts and Expenditure.—Abstract Account of the Appropriated Receipts and Expenditure of the Civil List, and of Balances in the Exchequer appropriated to the Civil List in each Financial Year from 5th January 1801 to 5th January 1831, up to the Accession of His Majesty King William the 4th, when all Charges of a public character, and not immediately connected with the Dignity and State of the Crown and the Personal Comfort of the Sovereign, were separated from the Civil List; distinguishing the Civil List for Great Britain and for Ireland, the Irish Civil List having been first surrendered to Parliament by King William the 4th - p. 176

Appendix 5.—Special Appropriated Duties.—Abstract Account of Balances, Receipts, and Expenditure of certain specially Appropriated Duties in Great Britain and in Ireland, which passed through the Exchequer, but were applicable to Local Purposes only, for each Financial Year from 1801; these Amounts being excluded from the preceding Accounts of the Public Income and Expenditure of the United Kingdom, in accordance with the practice in the Public Accounts since 1822, in pursuance of the recommendation of the Committee on Public Accounts in that Year; not being considered a part of the Public Income and Expenditure, or at the disposal of Parliament - - - p. 181

Appendix 6.—Sinking Fund.—I. Balanced Abstract Accounts of the Receipts and Expenditure of the several Sinking Funds in each Financial Year from the first establishment of the Sinking Fund in 1716, per 3 Geo. 1, c. 7, to 31st March 1869 - - - - - p. 198

II. General Abstract of the preceding Sinking Fund Accounts, for each Financial Year from 1716 to 1869; showing also the Amounts of Surplus Income, or Excess of Expenditure, in each Year, from 1688, as stated in the preceding Income and Expenditure Accounts, together with the Net Excess of Money applied to the Reduction of Debt, or of Money raised by the Creation of Debt - - - - - p. 280

Appendix 7.—Donations and Bequests towards reducing the National Debt.—Abstract Account showing the Amounts in each Financial Year from the passing of the Act 4 Geo. 4, c. 19, in 1823, up to 31st March 1869,—

1. Of Donations and Bequests towards reducing the National Debt, including the money value of Stock bequeathed;
2. Of Dividends received by the National Debt Commissioners on £. 3 per Cent. Stock held on account of such Donations and Bequests;
3. Of the Total of Sums in Columns 1 and 2;
4. Of £. 3 per Cent. Stock purchased or bequeathed on such account;
5. Of the Total such Stock held at the end of the Year;
6. Of such Stock cancelled in pursuance of the Act 29 Vict. c. 11;

Showing also the Total Amounts of the several Columns - - - - - p. 290

Appendix 8.—Unclaimed Dividends, &c.—Abstract Account showing the Amounts in each Financial Year from the passing of the Act 56 Geo. 3, c. 97, in 1816, up to 31st March 1869,—

1. Of Unclaimed Dividends, Lottery Prizes, &c., received at the Exchequer;
2. Of Sums issued from the Exchequer to make up the Deficiency of the Amount of Unclaimed Dividends at the Bank of England and South Sea House;
3. Of the Net Balance received in each Year;
4. Of the Net Balance issued in each Year;

Showing also the Total Amounts of the several Columns - - - - - p. 291

Appendix 9.—Stock transferred for Unclaimed Dividends.—Abstract Account showing the Amounts at the Bank of England, in each Financial Year from the passing of the Act 56 Geo. 3, c. 60, in 1816, and at the South Sea House, per 7 & 8 Vict. c. 80, from 1844, up to 31 March 1869,—

1. Of Stock transferred to the Commissioners of the National Debt, the Dividends of which were unclaimed for 10 years;
2. Of such Stock reclaimed and re-transferred;
3. Of the Total Balance of such Stock held at the end of the year by the said Commissioners;
4. Of Stock purchased with such Unclaimed Dividends;
5. Of such Stock sold on account of Unclaimed Dividends;
6. Of the Total Balance of such Stock held at the end of the year by the said Commissioners,

p. 292

Appendix 10.—Life and Terminable Annuities.—Abstract Account showing the Amounts in each Financial Year from the passing of the Act 48 Geo. 3, c. 142, in 1808, up to 31st March 1869,—

1. Of Stock purchased or transferred for Life Annuities, or Annuities for terms of Years;
 2. Of the Total of such Stock at the end of the Year;
 3. Of other Securities so purchased or transferred, distinguishing—
 - (1). Long Annuities;
 - (2). Exchequer Bills;
 - (3). The Amount of Stock equivalent to such Long Annuities and Exchequer Bills;
 4. Of Dividends on such Stock and Long Annuities, received by the National Debt Commissioners, and carried to the Sinking Fund;
 5. Of such Life and Terminable Annuities granted;
 6. Of such Life and Terminable Annuities expired, or unclaimed;
- Showing also the Total Amounts of the several columns; together with the amounts of such Stock or other Securities cancelled, and the period when cancelled, and Dividends and Interest ceased, p. 294

Appendix 11.—Redemption of Land Tax.—Abstract Account of the Amount of Land Tax received at the Exchequer, of Land Tax redeemed, and of Stock transferred and purchased for Redemption of Land Tax, &c., in each Financial Year, from the passing of the Act 38 Geo. 3, c. 60, in 1798, to 31 March 1869, viz. :—

1. Land Tax received at the Exchequer, including Interest on Amount of Contracts for the Redemption of Land Tax;
2. Land Tax redeemed;
3. Total Land Tax redeemed up to the end of the Year;
4. Stock transferred and purchased for Redemption of Land Tax;
5. Annual Dividend of such Stock;
6. Total such Stock transferred and purchased up to the end of the Year;
7. Annual Dividend of such Total Stock;
8. Total such Stock held by Commissioners of National Debt, and bearing Interest for Accumulation;
9. Annual Dividend of such Stock held - - - - - p. 296

Appendix 12.—National Debt.—Abstract Account of the Amount of Capital of Funded and Unfunded Debt of Great Britain and Ireland, at the close of each Financial Year from 1688 to 31st March 1869 (as shown up to 1858 in Commons Paper, No. 443, of 1858, page 70, &c.), together with the Annual Charge for Interest of Funded and Unfunded Debt (including Management), and for Life and Terminable Annuities; distinguishing the Public Debt of Great Britain and of Ireland, up to the period of the Consolidation of the National Debts of the two kingdoms, on 5th January 1817, per 56 Geo 3, c. 98, under the terms of the Treaty of Union - - - - - p. 298

Appendix 13.—Explanatory and Historical Notices of the several Heads of Public Income and Expenditure included in the preceding Accounts, from 1688 to 1869, and of matters relating to these Financial Accounts - - - - - p. 313

UNITED KINGDOM.

I.—ACCOUNTS of the GROSS PUBLIC INCOME of the *United Kingdom*, deducting Drawbacks, Repayments, &c., and Bounties of the nature of Drawbacks, and of the Gross Public Expenditure, including Payments out of Gross Revenue in progress to the Exchequer for Collection of Revenue and other National Objects, for each Financial Year from the 5th January 1801 to 31st March 1869; and of other Receipts into and Issues from the Exchequer, distinguishing Amounts raised by Creation of Debt, and Amounts applied to Reduction of Debt; showing also the Balances in the Exchequer at the Beginning and End of each Year.

EXPLANATORY NOTES, in relation to the form of these Accounts.

1. Previously to 1854-5, the Public Income and Expenditure of the United Kingdom were declared by law to consist of the Net Receipts into and Issues from the Exchequer, thus excluding from both sides of the Account the Amounts of Gross Revenue applied in progress to the Exchequer in Payment of Costs of Collection and Management of Revenue, and for other National Objects. In pursuance of the Act 17 & 18 Vict. c. 84, passed in 1854 (by which Act the Gross Income and Expenditure was brought under the more immediate view and control of Parliament, and the termination of the financial year, so far as relates to the Finance Accounts, was altered from 5th January to 31st March in each year), a separate Quarterly Account of the Net Public Income and Expenditure was issued for the quarter from 5th January to 31st March 1854; and from and after this last date, those portions of the Gross Revenue which had previously been excluded, were brought into the published Accounts of Gross Income and Expenditure, the first of such Annual Accounts being for the year ended 31st March 1855.

2. The Explanatory Notes, 1, 2, 3, 4, 5, and 7, prefixed to the Accounts of the Gross Income and Expenditure of Great Britain from 1801 to 1817 (Part I., p. 359), and Notes 1, 2, and 4, prefixed to similar Accounts for Ireland (p. 393), are applicable also to the following Accounts of the United Kingdom.

With reference to Note 2 (p. 393), it should be observed that up to 5 January 1817, the gross amount of receipt of Assessed Taxes, Ireland, is here included under the head of "Excise," these taxes being then under the management of the Excise Commissioners, and their amount not being separately distinguished in the Excise Accounts. From 5 January 1817, the gross amount has been distinguished, and is therefore included under the head of "Taxes." The Assessed Taxes, Ireland, were finally repealed in 1823, but some arrears were received in later years. The total amount of the Gross Produce of Assessed Taxes in Ireland, in each year from 1800 to 1834, may be found stated under their separate heads, in Commons Paper, No. 194, of 1834, p. 31.

3. In the following Accounts the Payments out of Gross Revenue are classed under two general heads only, viz., Costs of Collection and Management of Revenue, and other Payments for National Objects. A more detailed statement of these Payments, as well as the Amounts of each Branch of Gross Revenue so applied, will be found in Appendix I.

4. The Balances, Receipts, and Expenditure of certain specially appropriated Duties applicable to local purposes, which passed through the Exchequers of Great Britain and Ireland, and were included in the preceding Accounts of Public Income and Expenditure up to 5th January 1817 (as stated in Note 6, p. 359 of Part I.), are excluded from the following Accounts, in conformity with the practice in preparing the Public Accounts adopted since 5th January 1822, in pursuance of the recommendation of the Committee

on Public Accounts in 1822, the Amounts not being considered as a part of the Public Income and Expenditure, or at the disposal of Parliament. They will be found separately stated in Appendix 2.

5. Certain small sums received into the Exchequer as "Interest on Contracts for the Redemption of Land Tax," and included in the Finance Accounts under the head of "Miscellaneous," have been included in the following Accounts under the head of Land Taxes, &c., as being in fact the produce of the Land Tax.

6. The Miscellaneous Receipts of Income are classed under two heads:—1. The Receipts of Miscellaneous Revenue, more properly so called; 2. Other Miscellaneous Income, consisting of Repayments, or of the nature of Repayments, of Monies charged as Expenditure, and which should be distinguished from Repayments of Advances on Loan, shown under a separate head, and not considered as Income.

7. In the Annual Balance Sheets of Public Income and Expenditure, under the heads of Money Raised by Creation of Debt, and Money Applied to the Reduction of Debt, it has always been the practice to include, upon both sides of the Account, the Amounts of Exchequer Bills, &c., Funded, being a conversion of Unfunded into Funded Debt.

Since 1808, a very large amount of Capital Stock of Funded Debt has been converted into Life and Terminable Annuity Debt. This last description of Debt has always been held to be Funded Debt, and it has never been the practice to include in the Balance Sheet the Amounts of one description of Funded Debt converted into another. It must be obvious that the immediate result of such a conversion of Capital Stock of Fund Debt into Annuity Debt is to reduce by a very large sum the Nominal Amount of the Capital of the National Debt, and at the same time to add largely to the annual charge of the Debt. This last result alone is shown in the Annual Accounts of Income and Expenditure, by the increased amount of this head of expenditure.

8. In the earlier Annual Accounts of Income and Expenditure, during the period from 1816, when the Act 56 Geo. 3, c. 97, was in operation, it was the practice to include on one or the other side of the Account, only the Net Balance received into or issued from the Exchequer, on account of Unclaimed Dividends. In later years the total sum received and issued has been shown on the two sides of the Account. In the following Accounts of Gross Income and Expenditure, the Net Balance is stated on its proper side of the Account, together with the total amounts received and issued from which it results. A complete statement for the whole period is shown in a tabular form in Appendix 8.

9. The payments to the Bank of England for Management of the Sinking Fund Life Annuities, which were included under the head of "Miscellaneous Charges" in the Annual Finance Accounts up to 5th January 1822, are placed in the following Accounts under the head of Charges of the "Public Debt," according to the practice adopted in 1822, as recommended by the Committee of Public Accounts in that year.

10. The Expenses of the Management of the Sinking Fund in Ireland, which were included in the Finance Accounts under the head of Miscellaneous Charges of Civil Government up to 5th January 1822, and were then placed among the Charges of "Public Debt," as recommended by the Committee of Public Accounts in 1822, are included in the following Accounts for the whole period from 1801 to 1830, when such Expenses ceased, under the head of Management of Debt.

11. In the following Accounts, the Net Amount paid out of the Sinking Fund for Life Annuities in each year from 1808 to 1829, by the Commissioners for the Reduction of the National Debt, is stated, excluding from both sides of the Account the Amounts of such Annuities expired or unclaimed after being set apart for payment. These Amounts may be found in the Detailed Account of the Sinking Fund, in Appendix 5.

12. In the Balance Sheets of Income and Expenditure published from time to time, it was the practice to exclude from the Income side, receipts specially applicable to the Civil List, and on the Expenditure side to state the charge of the Civil List, as the actual Expenditure, excluding the Civil List Balances from the stated Amount of Balances in the Exchequer. The following Accounts include all Civil List Monies actually received into the Exchequer, and all Payments actually made from the Exchequer for the Civil List up to 1830-1, when, at the Accession of King William IV., all charges of a public character, and not immediately connected with the dignity and state of the Crown, and the personal comfort of the Sovereign, were separated from the Civil List. The Civil List Balances are also included in the Exchequer Balances for the same period. A separate Account of these Balances, as well as of the Appropriated Receipts and Expenditure of the Civil List for each year from 1801 to 1831, will be found in Appendix 4.

13. In the following Accounts, Advances by way of Loan, and Repayments of those Advances, are shown under separate heads, on either side of the Accounts, for the whole period from 1801, although this practice of distinguishing the amounts of Advances and Repayments was not begun in the public Accounts of Income and Expenditure until 1829, in pursuance of the recommendation of the Finance Committee of 1828.

Some corrections in the amounts hitherto stated under these two heads have been made in the following Accounts, by including further Sums than have been included in the earlier Finance

Finance Accounts. For instance, certain Receipts of Canal and Dock Duty, which are included in the Finance Accounts and Balance Sheets up to 1843, under the head of Customs, were actually repayments of amounts advanced for improving the Port of London. These sums are now transferred from the head of Customs to that of Repayments of Advances.

A further correction has been made under the head of Advances for Public Works, &c., under the following circumstances:—During the period from 1817 to 1843, Advances by way of Loan for Public Works in Great Britain were made to a large amount in Exchequer Bills. All repayments of both principal and interest of these loans were correctly carried to the head of Repayments of Advances, but the amount of interest on such Exchequer Bills issued from the Exchequer was less correctly included under the general head of Interest on Exchequer Bills; this amount is now included under the head of Advances, so far as it can be separately distinguished.

Again, a large amount in Exchequer Bills was similarly advanced for Public Works in Ireland, from 1833 to 1844, and the total amount issued from the Exchequer in each year, both of principal and interest, was correctly carried to the head of Advances by way of Loan. The principal of these Irish Public Works Bills was payable at the end of three years, being charged upon the Repayments or upon the Consolidated Fund. But such principal amount of Exchequer Bills, when paid off, was incorrectly charged a second time in the Annual Finance Accounts, under the head of Advances by way of Loan, instead of being charged as Unfunded Debt Redeemed, under which head they are included in the following Accounts.

Such corrections of the Amounts stated as Advances by way of Loan in the earlier part of the period, can be made only to a limited extent. In the Parliamentary Return of Advances for Public Works, Commons Paper, No. 718 of 1847, p. 149, it is officially stated that “to a large extent it is impossible to distinguish from the records whether Advances have or have not been as Loans to be repaid.”

14. The Expenditure for Army and Ordnance Services for the whole period from 1801, is stated in one sum in the following Accounts, according to the practice adopted in the Public Income and Expenditure Accounts since 1856. Previously to 1827 the charge for Barracks and some other expenditure out of Extraordinaries was transferred from the Army to the Ordnance Vote, so that any comparison of the expenditure for either service, taken alone for the whole period from 1801, would necessarily be defective.

It should also be observed that previously to 1828 the charge for Ordnance Sea Service was included in the Navy Vote, and was first transferred to the Ordnance Vote in that year. In 1828, and subsequent years, the expenditure for Ordnance Sea Service is included under the head of Ordnance Services.

No public charge was incurred for the Out-Pensioners of Greenwich Hospital until 1817, when it formed part of the Navy Vote, to the amount of 251,400 £.

15. Certain payments made from time to time for redemption of Hereditary Pensions are placed in the following accounts under the head of “Reduction of Debt.” In the Finance Accounts, and the annual Income and Expenditure Accounts presented to Parliament previous to 1855, which show the net amounts and expenditure according to the Exchequer issues, the payments in question, when made from the Consolidated Fund amongst the Miscellaneous Payments, or out of Supplies, have been included under these heads of Expenditure, whilst the redemption payments out of Gross Revenue have been necessarily excluded altogether from these Net Accounts. But since 1855, all such payments, which have been made out of Gross Revenues, have been excluded from the expenditure, and included under the head of Reduction of Debt. It has consequently been thought expedient now to adopt this last arrangement uniformly for the whole period from 1801.

There are however some cases in which such Hereditary Pensions have been redeemed which were chargeable upon the Gross Land Revenues of the Crown. As the Net Amount only of the Revenues of the Crown Lands are included in these Accounts, the payments for the redemption of such pensions, which have been usually made out of the Capital of the Land Revenue, are necessarily excluded from the following annual accounts.

Further details of the redemption of these Hereditary Pensions will be found in Appendix 13, under the head of “Pensions.”

* Up to 1836 Exchequer Bills charged on Supplies, and issued for Public Works, Great Britain, for West India Relief, and for building churches, were exchanged for the ordinary Supply Bills. At the exchange of 19th December 1836, this practice was altered, and thenceforward, when due, they were paid off in money.

(7 Will. IV. & 1 Vict.) GROSS PUBLIC INCOME and EXPENDITURE of the *United Kingdom*, and of other

† Post Office Packet Service transferred from Navy to Post Office in 1860-61.

Appendix, No. 1.

GROSS REVENUE RECEIVED AND APPLIED IN PROGRESS TO THE EXCHEQUER.

ABSTRACT ACCOUNT of such Amounts of GROSS REVENUE received, as were applied, in progress to the Exchequer, to Payment of Costs of Collection and Management of Revenue, and to other Payments for National Objects, in each Financial Year from 5th January 1801 to 31st March 1857, when such Payments out of Gross Revenue ceased; including also in Costs of Collection and Management, and distinguishing, certain Sums issued from the Exchequer out of the Receipts from Land and Assessed Taxes to Receivers of those Duties, up to 1825, when such Issues ceased.

EXPLANATORY NOTES.

In order that the several sums in the following Abstract Accounts may be stated upon one uniform principle for the whole period, some alterations have been made in the respective amounts of Gross Revenue applied to Costs of Collection, and to other Payments for National Objects, as they appear under their respective heads in the Abstract Accounts of the Annual Finance Accounts, and in other Accounts from time to time presented to Parliament, particularly in the Parliamentary Return, No. 209, of 1843. The principal alterations are as follows:—

1. Customs.—In the earlier years Warehousing Charges, as well as certain payments on account of the Coast Guard, &c., have been transferred from the head of "Other Payments" to that of "Costs of Collection and Management," according to the practice of later years. The charges for building the New Custom House in London, and New Docks and Storehouses in Ireland, have, in like manner, been transferred to the head of "Costs of Collection and Management."

The sums advanced out of the Gross Revenues of Customs and Excise in Ireland, on account of Navy and Army Half-pay, Pensions, &c., which were included in the Irish Gross Expenditure from 1801 to 1817, and are classed under the head of "Other Payments out of Gross Revenue" in the Finance Accounts from 1817 to 1829, are transferred in the following Accounts to the head of "Advances by way of Loan." These sums, when repaid, appear in the Finance Accounts from 1801 to 1830, as part of the Miscellaneous Net Income of Ireland up to 1817, and thenceforward are included in the Miscellaneous Net Income of Great Britain, under the head of "Imprests and other Moneys Paid, &c.," but they are now included under the head of "Repayments of Advances." Since 1830, these advances have been more correctly classed in the Annual Finance Accounts under the head of "Balances of Gross Revenue in the hands of Collectors, &c.," to which heads they were transferred in pursuance of the recommendation of the Committee of Public Accounts in 1822. The amounts of these advances have consequently been altogether excluded from the Public Income and Expenditure Accounts since 1830; when repaid, the several sums are carried to the receipt side of the Accounts under their respective heads of Revenue.

2. Excise.—Certain sums for compensation to Tax Officers, Ireland, paid out of the Gross Revenues of Excise, have been transferred from "Other Payments" to "Costs of Collection," &c., in like manner as compensations to Coast Guard Officers, referred to in No. 1.

3. Stamps.—The Amounts paid out of the Gross Revenue of Stamps, for paper and parchment to stamp on, were included in the Costs of Collection of Revenue in Ireland from 1801 to 1812, and were excluded under the head of "Drawbacks and Allowances," both in Ireland subsequently to 1812, and in Great Britain from 1801 up to 1854, since which period they have been included in Costs of Collection. In the following Accounts these charges are included in the Costs of Collection for the whole period from 1801.

4. Post Office.—The charge of building the New Post Office, Dublin, has been transferred from the head of "Other Payments" to "Costs of Collection and Management," the charge of building the New Post Office, London, having been included under the latter head.

The annual payment from the British to the Irish Post Office of 4,000 *l.*, per 55 Geo. 3, c. 145, in lieu of the estimated profit on the Packet Establishment (increased in 1815 to 9,000 *l.*), and referred to in Note 2, p. 359 of Part I., is excluded from the head of "Other Payments," being included in the amount of Irish Post Office Receipt. These annual payments ceased on 5th July 1827. A similar course is pursued with the amounts of Irish Inland Postage received in Great Britain. Both these amounts are included under the head of "Other Payments" in the Accounts for the United Kingdom up to 1827.

5. Imprest Advances to Collectors.—These sums, which are included under the head of "Other Payments" in the Finance and other Accounts up to 1822, are excluded from the following Accounts. (See Note 4, p. 359, Part I.)

6. Crown Lands.—All payments out of Gross Revenue of Crown Lands, Woods and Forests, &c., in progress to the Exchequer, including costs of collection, are excluded from the following Accounts, for the reasons stated in Note 5, p. 359, Part I. The amounts of these payments are stated separately in Appendix 3.

* Upon the accession of King William IV., and his Majesty's surrender to Parliament of the hereditary revenues of the Crown in Scotland, the charges for the Civil Government, Scotland, which till then were payable out of the Gross Hereditary Revenues, were, with the exception of the charges of the Judicial Establishment, and other small charges payable under the terms of the Treaty of Union, transferred partly to the Consolidated Fund and partly to the annual supply grants, in pursuance of the recommendation of a Committee of the House of Commons, in their Report, dated October 1831.

† Packet Service transferred to Navy in 1837-8.

Appendix, No. 1.]

* In all the public accounts of Gross Revenue applied to payments when in progress to the Exchequer, from 1843 to 1857, which have been hitherto published, no separate apportionment appears of the amounts of Land and Assessed Taxes, and of Property and Income Tax so applied. Such apportionment has now for the first time been made by the Inland Revenue Department, for the purpose of this Return.

Exchequer, to Payment of Costs of Collection and Management of Revenue, &c.—*cont^d*.
